ITEM 2.02 Results of Operations and Financial Condition

On July 22, 2008, Phoenix Technologies Ltd. (the Company) issued a press release announcing its financial results for the quarter ended June 30, 2008. A copy of the press release is furnished as Exhibit 99.1 to this report.

The press release contains non-GAAP calculations of net income (loss) and net income (loss) per share that exclude equity-based compensation, restructuring cost and amortization of purchase technology. The Company's management believes these non-GAAP financial measures provide meaningful supplemental information to investors, as well as management, that is indicative of the Company's core operating results and facilitates comparison of operating results across reporting periods as well as comparison with other companies. The Company uses these non-GAAP measures when evaluating its financial results as well as for internal planning and budgeting purposes. Equity-based compensation and restructuring costs are excluded from non-GAAP financial results since they may not be considered directly related to our on-going business operations. Amortization of purchased technology is excluded from non-GAAP financial results since it generally cannot be changed by management after an acquisition of technology has occurred. These non-GAAP measures should not be viewed as a substitute for the Company's GAAP results, and may be different than non-GAAP measures used by other companies. Investors and potential investors are encouraged to review the reconciliation of non-GAAP financial measures contained within the attached press release with their most directly comparable GAAP financial results.
