OVERVIEW

LETTER TO SHAREHOLDERS

September 20, 2002

Dear Shareholder,

Due to events in the markets and the well-publicized controversies surrounding certain companies, the recent months have been challenging for many investors.

Against this backdrop, you may be re-evaluating your investments. In this regard, your financial advisor is a particularly valuable resource. Your advisor can help you review your current asset allocation and determine whether it remains appropriate for your goals, risk tolerance and time horizon.

You also have a time-tested partner in Van Kampen. With roots extending to 1927, our legacy spans other market downturns and periods of uncertainty. While the causes of turbulence have changed, our generations of experience have taught us the enduring value of patience, discipline and long-term

focus.

Thank you for your continued trust in Van Kampen. We appreciate the opportunity to help you and your loved ones enjoy life's true wealth--family, friends and life's daily pleasures.

Sincerely,

[SIG]

Richard F. Powers, III
President and CEO
Van Kampen Asset Management Inc.

ECONOMIC SNAPSHOT

THE ECONOMY

THE STRENGTH OF THE ECONOMY'S APPARENT, YET FRAGILE, RECOVERY GARNERED CONSIDERABLE ATTENTION THROUGHOUT THE REPORTING PERIOD. WEAK SECOND-QUARTER GROWTH, FOLLOWED BY ANECDOTAL EVIDENCE OF A MID-SUMMER ECONOMIC PERFORMANCE THAT WAS BELOW EXPECTATIONS, LEFT MANY WONDERING WHETHER THE THIRD QUARTER WOULD RECORD ANY POSITIVE PROGRESS. AS SUCH, AUGUST'S POSITIVE DEVELOPMENTS--IMPROVED CORPORATE PROFITS, STRONG RETAIL SALES, AND MODEST EMPLOYMENT GAINS--HELPED DOWNPLAY SUCH CONCERNS.

CONSUMER SPENDING REMAINED UNEXPECTEDLY STRONG THROUGHOUT THE REPORTING PERIOD, BOLSTERED BY 0-PERCENT FINANCING DEALS OFFERED BY AUTO MANUFACTURERS AND HISTORICALLY LOW MORTGAGE RATES THAT SPARKED ANOTHER SURGE IN HOME MORTGAGE REFINANCING. IN CONTRAST, BUSINESS SPENDING REMAINED AT SUBDUED, ALBEIT GRADUALLY GROWING LEVELS. BUT THE ONGOING CONCERN OF WAR WITH IRAQ AND SLOW JOB GROWTH COMBINED TO DRAG CONSUMER CONFIDENCE BACK TO LEVELS WITNESSED IN THE FOURTH QUARTER OF 2001.

AGAINST THIS BACKDROP, THE FED TOOK A WAIT-AND-SEE APPROACH AND LEFT ITS INTEREST RATE TARGET FOR FEDERAL FUNDS AT 1.75 PERCENT. HOWEVER, DURING ITS REGULARLY SCHEDULED AUGUST 12 MEETING, THE FED SHIFTED ITS BIAS FROM ECONOMIC NEUTRALITY TO CONCERN OVER POTENTIAL ECONOMIC WEAKNESS. THIS POLICY SHIFT ONLY REINFORCED INVESTORS' CONCERNS ABOUT SLOW GROWTH.

(1)The figure shown represents the performance of the Chase Global High Yield Index since its inception date of 12/31/93.

This chart compares your fund's performance to that of the Chase Global High Yield Index and the Lipper High Yield Bond Fund Index over time.

Edgar Filing: VAN KAMPEN HIGH INCOME CORPORATE BOND FUND - Form N-30D

These indexes are unmanaged broad-based, statistical composites and their performance does not include any sales charges or fees that would be paid by an investor purchasing the securities they represent. Such costs would lower performance. The historical performance of the index is shown for illustrative purposes only; it is not meant to forecast, imply, or guarantee the future performance of any investment vehicle. It is not possible to invest directly in an index.

The above chart reflects the performance of Class A shares of the fund. The performance of Class A shares will differ from that of other share classes of the fund because of the difference in sales charges and/or expenses paid by shareholders investing in the different share classes. The fund's performance assumes reinvestment of all distributions, and includes payment of the maximum sales charge (4.75% for Class A shares) and combined Rule 12b-1 fees and service fees of up to 0.25 percent. The performance above does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Results are hypothetical.

While past performance is no guarantee of future results, the above information provides a broader vantage point from which to evaluate the discussion of the fund's performance found in the following pages.

(1) Assumes reinvestment of all distributions for the period and does not

include payment of the maximum sales charge (4.75% for Class A Shares) or contingent deferred sales charge (CDSC) for Class B and Class C Shares. On purchases of Class A Shares of \$1 million or more, a CDSC of 1% may be imposed on certain redemptions made within one year of purchase. Returns for Class B Shares are calculated without the effect of the maximum 4% CDSC, charged on certain redemptions made within the first and second year of purchase and declining to 0% after the fifth year. Returns for Class C Shares are calculated without the effect of the maximum 1% CDSC, charged on certain redemptions made within one year of purchase. If the sales charges were included, total returns would be lower. These returns include combined Rule 12b-1 fees and service fees of up to .25% for Class A Shares and 1% for Class B and Class C Shares and do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or redemption of Fund shares.

Q&A WITH YOUR PORTFOLIO MANAGERS

WE RECENTLY SPOKE WITH THE PORTFOLIO MANAGEMENT TEAM FOR THE VAN KAMPEN HIGH INCOME CORPORATE BOND FUND ABOUT THE KEY EVENTS AND ECONOMIC FORCES THAT SHAPED THE MARKETS AND INFLUENCED THE FUND'S RETURN DURING THE 12-MONTH PERIOD ENDED AUGUST 31, 2002. THE FUND IS MANAGED BY THE ADVISER'S HIGH YIELD TEAM. MEMBERS OF THE TEAM(1) INCLUDE STEPHEN ESSER, MANAGING DIRECTOR; GORDON LOERY, EXECUTIVE DIRECTOR; AND DEANNE LOUGHNANE, EXECUTIVE DIRECTOR. THE FOLLOWING DISCUSSION REFLECTS THEIR VIEWS ON THE FUND'S PERFORMANCE.

(1) Team members may change without notice at any time.

Q HOW WOULD YOU CHARACTERIZE
THE MARKET ENVIRONMENT OF THE PAST 12 MONTHS?

A The past 12 months have been an extraordinarily turbulent time for the high-yield market. The period began with the terrorist attacks of September 11, which precipitated one of the worst single months in the history of the high-yield market. All sectors related to travel, including airlines, gaming and hotels, were especially hard hit as travel dropped around the world. Economically sensitive sectors also suffered as business activity nationwide came to a halt for several days. Sectors that had already been performing poorly, such as telecom and wireless, joined in the general decline.

Much of that trend reversed, however, when investors' expectations for the economy turned positive in October. Fears of a prolonged recession gave way to an anticipation of imminent growth. At the same time, it appeared that many investors saw high-yield securities as an attractively valued asset class after the September sell-off. As a result, the high-yield market rallied strongly through the end of 2001, and managing over that time to regain a large portion of its September losses.

The high-yield market continued to perform strongly through the first four months of 2002 as the economy appeared to be getting back on track. Those gains came to an end in May, however, when the high-yield market began to slump in tandem with the equity markets. Credit concerns began to overwhelm the market when Qwest and WorldCom, two large investment-grade issuers, were downgraded to junk status. The market environment turned worse shortly after that when a

Edgar Filing: VAN KAMPEN HIGH INCOME CORPORATE BOND FUND - Form N-30D

stream of accounting scandals began to seriously undermine investor confidence in the financial statements of public companies. The high-yield sector experienced significant outflows

8

through the month of July, including a 10-consecutive-week run of asset losses.

Against this volatile backdrop, sector performance varied highly. Many sectors, including those most sensitive to broader economic activity, experienced alternating periods of weak and strong performance in keeping with more pervasive investor expectations for economic growth. Telecom continued its losing streak, with its already weak relative performance worsened by WorldCom's default. The cable and wireless sectors also underperformed, with the cable sector experiencing a high-profile business scandal and many wireless companies showing lower growth during this period.

Q HOW DID THE FUND PERFORM
IN THIS ENVIRONMENT?

A The fund continued to provide shareholders with what we believe to be an attractive level of income, as its monthly dividend of \$0.0334 per Class A share translates to a distribution rate of 12.11 percent based on the fund's maximum offering price as of August 31, 2002. For the 12-month period ended August 31, 2002, the fund generated a total return of -15.75 percent.

Performance information for the fund reflects Class A shares at net asset value, including combined Rule 12b-1 fees and service fees of up to 0.25 percent and excluding a maximum sales charge of 4.75 percent; if the maximum sales charge were included, the return would be lower. The return above does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Of course, past performance is no guarantee of future results. Performance of other share classes will vary. Investment return and principal value will fluctuate and fund shares, when redeemed, may be worth more or less than their original cost. As a result of recent market activity, current performance may vary from the figures shown. For more up-to-date information, please visit vankampen.com or speak with your financial advisor.

By comparison, the Chase Global High Yield Index posted a total return of -2.75 percent and the Lipper High Yield Bond Fund Index posted a total return of -8.77 percent for the same period. The Chase Global High Yield Index is a broad-based, unmanaged index that reflects the general performance of the global high-yield corporate debt market. The Lipper High Yield Bond Fund Index is an index of funds with similar return objectives. These index returns do not include any sales charges or fees that would be paid by an investor purchasing the securities they represent. Such costs would lower performance. It is not possible to invest directly in an index. For additional performance results, please refer to the chart and footnotes on page 5.

Q WHAT WERE THE KEY DRIVERS OF
THE FUND'S PERFORMANCE RELATIVE TO THESE BENCHMARKS?

A Toward the beginning of the period, our analysis indicated that the most prudent course for the portfolio would be to trim several overweighted positions in order to reduce the fund's overall risk profile. We successfully took some of these positions down over the course of the period, including the fund's above-market holdings in the

9

Edgar Filing: VAN KAMPEN HIGH INCOME CORPORATE BOND FUND - Form N-30D

telecom, wireless and cable sectors. However, we were not able to sell out before accounting scandals overwhelmed the market, and the fund suffered somewhat from the fallout.

Q WHAT STRATEGIES DID YOU USE
IN MANAGING THE FUND?

A As mentioned, one of the primary strategies we employed involved a reduction in the fund's holdings in sectors that we thought most likely to underperform in the coming months. The biggest change was in the wireless sector, where we cut the fund's exposure by two-thirds over the course of the period. We also reduced the fund's holdings in several sectors where we identified individual companies that had either met our performance targets or we believed were unlikely to deliver strong performance. For example, we sold the bonds of several cable companies whose business prospects no longer warranted keeping an exposure to them in the portfolio.

We put the proceeds from these sales to work in a variety of situations. The bulk of these were ideas generated by our bottom-up research at the company level. Through this process we added what we believed to be attractively priced bonds in the energy, gaming and media sectors.

We also began to position the fund selectively to possibly gain from any upturn in economic activity by adding to holdings in such economically sensitive sectors as manufacturing and transportation. We also concluded that the U.S. consumer sectors were unlikely to participate as fully as others in a recovery. As a result, we kept the fund underweighted in consumer-related issues in order to protect shareholders from any weakness there.

Q WHAT IS YOUR OUTLOOK FOR THE
HIGH-YIELD MARKET?

A We are confident that the current state of mistrust regarding public companies is likely to sort itself out in the coming months. With both management and auditors under enormous pressure to produce clean results, we believe that the worst is behind us in terms of the sheer number of negative announcements and revisions. This is likely to be a positive force for investor confidence and, by extension, the high-yield market.

As for the high-yield market itself, spreads are currently at close to all-time high levels. These attractive prices, coupled with low interest rates in the broader economy, could well begin to lure investors back to the high-yield asset class. While this is of course impossible to predict with certainty, we believe that the current level of valuations may prove beneficial for high-yield investors. The most significant unknown in this equation is the state of the U.S. economy. As always, we will continue to watch the market and economy closely for opportunities.

GLOSSARY OF TERMS

A HELPFUL GUIDE TO SOME OF THE COMMON TERMS YOU'RE LIKELY TO SEE IN THIS REPORT AND OTHER FINANCIAL PUBLICATIONS.

CREDIT RATING: An evaluation of a bond issuer's credit history and capability of repaying debt obligations. Standard & Poor's Ratings Group and Moody's Investors Service are two companies that assign credit ratings. Standard & Poor's ratings range from a high of AAA to a low of D, while Moody's ratings range from a high of Aaa to a low of C.

CREDIT SPREAD: Also called quality spread, the difference in yield between higher-quality issues (such as Treasury securities) and lower-quality issues. Normally, lower-quality issues provide higher yields to compensate investors for the additional credit risk.

DEFAULT: The failure to make required debt payments on time.

NET ASSET VALUE (NAV): The value of a mutual fund share, calculated by deducting a fund's liabilities from the total assets in its portfolio and dividing this amount by the number of shares outstanding. The NAV does not include any initial or contingent deferred sales charges.

YIELD: The annual rate of return on an investment, expressed as a percentage.

(a) As required, effective September 1, 2001, the Fund has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing premium on fixed income securities and presenting paydown gains and losses on mortgage- and asset-backed securities as interest income. The effect of these changes for the period ended August 31, 2002 was to decrease the ratio of net investment income to average net assets from 10.49% to 10.39%. Net investment income per share and net realized gains and losses per share were unaffected by the adjustments. Per share, ratios and supplemental data for periods prior to August 31, 2002 have not been restated to reflect this change in presentation.

(b) Assumes reinvestment of all distributions for the period and does not include payment of the maximum sales charge of 4.75% or contingent deferred sales charge (CDSC). On purchases of \$1 million or more, a CDSC of 1% may be imposed on certain redemptions made within one year of purchase. If the sales charges were included, total returns would be lower. These returns include combined Rule 12b-1 fees and service fees of up to .25% and do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

(a) As required, effective September 1, 2001, the Fund has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing premium on fixed income securities and presenting paydown gains and losses on mortgage- and asset-backed securities as interest income. The effect of these changes for the period ended August 31, 2002 was to decrease the ratio of net investment income to average net assets from 9.78% to 9.68%. Net investment income per share and net realized gains and losses per share were unaffected by the adjustments. Per share, ratios and supplemental data for periods prior to August 31, 2002 have not been restated to reflect this change in presentation.

(b) Assumes reinvestment of all distributions for the period and does not include payment of the maximum CDSC of 1% charged on certain redemptions made within one year of purchase. If the sales charge was included, total returns would be lower. These returns include combined Rule 12b-1 fees and service fees of up to 1% and do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

1. SIGNIFICANT ACCOUNTING POLICIES

Van Kampen High Income Corporate Bond Fund (the "Fund") is organized as a Delaware business trust, and is registered as a diversified, open-end management investment company under the Investment Company Act of 1940 (the "1940 Act"), as amended. The Fund's primary investment objective is to seek to maximize current income. Capital appreciation is a secondary objective which is sought only when consistent with the Fund's primary investment objective. The Fund commenced investment operations on October 2, 1978. The distribution of the Fund's Class B and Class C shares commenced on July 2, 1992 and July 6, 1993, respectively.

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

A. SECURITY VALUATION Fixed income investments and preferred stock are stated at value using market quotations or indications of value obtained from an independent pricing service. Investments in securities listed on a securities exchange are valued at their sale price as of the close of such securities exchange. Listed and unlisted securities for which the last sale price is not available are valued at the mean of the bid and asked prices. For those securities where quotations or prices are not available, valuations are determined in accordance with procedures established in good faith by the Board of Trustees. Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value.

B. SECURITY TRANSACTIONS Security transactions are recorded on a trade date basis. Realized gains and losses are determined on an identified cost basis. The Fund may purchase and sell securities on a "when-issued" or "delayed delivery" basis, with settlement to occur at a later date. The value of the security so purchased is subject to market fluctuations during this period. The Fund will maintain, in a segregated account with its custodian, assets having an aggregate value at least equal to the amount of the when-issued or delayed delivery purchase commitments until payment is made. At August 31, 2002, there were no when-issued or delayed delivery purchase commitments.

NOTES TO
FINANCIAL STATEMENTS

August 31, 2002

The Fund may invest in repurchase agreements, which are short-term investments in which the Fund acquires ownership of a debt security and the

Edgar Filing: VAN KAMPEN HIGH INCOME CORPORATE BOND FUND - Form N-30D

seller agrees to repurchase the security at a future time and specified price. The Fund may invest independently in repurchase agreements, or transfer uninvested cash balances into a pooled cash account along with other investment companies advised by Van Kampen Asset Management Inc. (the "Adviser") or its affiliates the daily aggregate of which is invested in repurchase agreements. Repurchase agreements are fully collateralized by the underlying debt security. The Fund will make payment for such securities only upon physical delivery or evidence of book entry transfer to the account of the custodian bank. The seller is required to maintain the value of the underlying security at not less than the repurchase proceeds due the Fund.

C. INCOME AND EXPENSES Interest income is recorded on an accrual basis and dividend income is recorded on the ex-dividend date. Discounts on debt securities are accreted and premiums are amortized over the expected life of each applicable security. Income and expenses of the Fund are allocated on a pro rata basis to each class of shares, except for distribution and service fees and transfer agency costs which are unique to each class of shares.

As required, effective September 1, 2001, the Fund has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing premium on fixed income securities. Prior to September 1, 2001, the Fund did not amortize premiums on fixed income securities. The cumulative effect of this accounting change had no impact on total net assets of the Fund, but resulted in a \$1,168,050 reduction in cost of securities and a corresponding \$1,168,050 decrease in net unrealized depreciation based on securities held by the Fund on September 1, 2001.

The effect of this change for the year ended August 31, 2002 was to decrease net investment income by \$607,466; increase net unrealized depreciation by \$187,544, and decrease net realized loss by \$795,010. The statement of changes in net assets and financial highlights for prior periods have not been restated to reflect this change in presentation.

The revised version of the Guide also requires that paydown gains and losses on mortgage- and asset-backed securities be presented as interest income. Previously, paydown gains and losses on mortgage- and asset-backed securities were shown as a component of realized gain/loss. The effect of this change for the year ended August 31, 2002 was an increase in net investment income and an increase in net realized loss of \$2,329.

NOTES TO FINANCIAL STATEMENTS

August 31, 2002

D. FEDERAL INCOME TAXES It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes is required.

The Fund intends to utilize provisions of the federal income tax laws which allow it to carry a realized capital loss forward for eight years following the year of the loss and offset such losses against any future realized capital gains. At August 31, 2002, the Fund had an accumulated capital loss carryforward for tax purposes of \$149,845,954 which expires between August 31, 2003 and August 31, 2010. Of this amount, \$8,026,371 will expire on August 31, 2003.

At August 31, 2002, the cost and related gross unrealized appreciation and depreciation are as follows:

Edgar Filing: VAN KAMPEN HIGH INCOME CORPORATE BOND FUND - Form N-30D

Cost of investments for tax purposes.....	\$ 806,115,303

Gross tax unrealized appreciation.....	\$ 10,336,941
Gross tax unrealized depreciation.....	(311,815,439)

Net tax unrealized depreciation on investments.....	\$ (301,478,498)
	=====

E. DISTRIBUTION OF INCOME AND GAINS The Fund declares daily and pays monthly dividends from net investment income. Net realized gains, if any, are distributed annually. Distributions from net realized gains for book purposes may include short-term capital gains which are included in ordinary income for tax purposes.

The tax character of distributions paid during 2002 and 2001 was as follows:

	2002	2001
Distributions paid from:		
Ordinary income.....	\$67,777,960	\$78,237,130
Long-term capital gain.....	0	0
Return of capital.....	5,289,644	1,176,956
	-----	-----
	\$73,067,604	\$79,414,086
	=====	=====

Due to inherent differences in the recognition of income, expenses and realized gains/losses under accounting principles generally accepted in the United States of America and federal income tax purposes, permanent book and tax basis differences relating to the return of capital distributions of \$5,288,466 were reclassified from accumulated undistributed net investment income to capital. Additionally, permanent book and tax differences of \$109,500 related to consent fee income and net realized foreign currency gains totaling \$951,540 were reclassified from accumulated undistributed net investment income to accumulated

NOTES TO
FINANCIAL STATEMENTS

August 31, 2002

net realized loss. Also, \$2,329 relating to the recognition of net realized gains on paydowns of mortgage pool obligations was reclassified from accumulated undistributed net investment income to accumulated net realized loss.

Net realized gains or losses may differ for financial reporting and tax purposes primarily as a result of post October losses which are not realized for tax purposes until the first day of the following fiscal year, gains or losses recognized for tax purposes on open forward transactions and the deferral of losses relating to wash sale transactions.

F. EXPENSE REDUCTIONS During the year ended August 31, 2002, the Fund's custody

Edgar Filing: VAN KAMPEN HIGH INCOME CORPORATE BOND FUND - Form N-30D

fee was reduced by \$26,011 as a result of credits earned on cash balances.

G. FOREIGN CURRENCY TRANSLATION Asset and liabilities denominated in foreign currencies and commitments under forward foreign currency contracts are translated into U.S. dollars at the mean of the quoted bid and ask prices of such currencies against the U.S. dollar. Purchases and sales of portfolio securities are translated at the rate of exchange prevailing when such securities were acquired or sold. Realized gain and loss on foreign currency transactions on the Statement of Operations includes the net realized amount from the sale of foreign currency and the amount realized between trade date and settlement date on securities transactions. Income and expenses are translated at rates prevailing when accrued.

2. INVESTMENT ADVISORY AGREEMENT AND OTHER TRANSACTIONS WITH AFFILIATES

Under the terms of the Fund's Investment Advisory Agreement, the Adviser will provide investment advice and facilities to the Fund for an annual fee payable monthly as follows:

AVERAGE DAILY NET ASSETS	% PER ANNUM
First \$150 million.....	.625%
Next \$150 million.....	.550%
Over \$300 million.....	.500%

For the year ended August 31, 2002, the Fund recognized expenses of approximately \$22,000 representing legal services provided by Skadden, Arps, Slate, Meagher & Flom (Illinois), counsel to the Fund, of which a trustee of the Fund is an affiliated person.

Under an Accounting Services Agreement, the Adviser provides accounting services to the Fund. The Adviser allocates the cost of such services to each fund. For the year ended August 31, 2002, the Fund recognized expenses of

NOTES TO FINANCIAL STATEMENTS

August 31, 2002

approximately \$48,300 representing Van Kampen Investments Inc.'s or its affiliates' (collectively "Van Kampen") cost of providing accounting services to the Fund which are reported as part of "Other" expenses in the Statement of Operations.

Van Kampen Investor Services Inc. (VKIS), an affiliate of the Adviser, serves as the shareholder servicing agent for the Fund. For the year ended August 31, 2002, the Fund recognized expenses of approximately \$1,073,000 representing transfer agency fees paid to VKIS. Transfer agency fees are determined through negotiations with the Fund's Board of Trustees and are based on competitive market benchmarks.

Certain officers and trustees of the Fund are also officers and directors of Van Kampen. The Fund does not compensate its officers or trustees who are officers of Van Kampen.

Edgar Filing: VAN KAMPEN HIGH INCOME CORPORATE BOND FUND - Form N-30D

The Fund provides deferred compensation and retirement plans for its trustees who are not officers of Van Kampen. Under the deferred compensation plan, trustees may elect to defer all or a portion of their compensation. Amounts deferred are retained by the Fund and to the extent permitted by the 1940 Act, as amended, may be invested in the common shares of those funds selected by the trustees. Investments in such funds of \$106,681 are included in "Other" assets on the Statement of Assets and Liabilities at August 31, 2002. Appreciation/ depreciation and distributions received from these investments are recorded with an offsetting increase/decrease in the deferred compensation obligation and do not affect the net asset value of the Fund. Benefits under the retirement plan are payable upon retirement for a ten-year period and are based upon each trustee's years of service to the Fund. The maximum annual benefit per trustee under the plan is \$2,500.

For the year ended August 31, 2002, Van Kampen, as Distributor for the Fund, received net commissions on sales of the Fund's Class A Shares of approximately \$125,600 and CDSC on redeemed shares of approximately \$608,200. Sales charges do not represent expenses of the Fund.

On October 27, 2000, the Fund acquired all of the assets and liabilities of the Van Kampen High Yield and Total Return Fund (the "VKHYTR Fund") through a tax free reorganization approved by VKHYTR Fund shareholders on October 11, 2000. The Fund issued 1,164,310, 3,514,197 and 907,160 shares of Classes A, B and C valued at \$5,670,192, \$17,149,280, and \$4,399,728, respectively, in exchange for VKHYTR Fund's net assets. The shares of VKHYTR Fund were converted into Fund shares at a ratio of .5025 to 1, .5045 to 1 and .5013 to 1, for Classes A, B and C, respectively. Included in these net assets was a capital loss carryforward of \$2,747,360 and deferred wash sale losses of \$49,802 which is included in accumulated net realized gain/loss. Net unrealized depreciation of VKHYTR Fund as of October 27, 2000 was \$5,150,365. Shares issued in connection with this reorganization are included in proceeds from shares sold for the year ended August 31, 2001. Combined net assets on the day of reorganization were \$721,982,089.

4. INVESTMENT TRANSACTIONS

During the period, the cost of purchases and proceeds from sales of investments, excluding short-term investments, were \$479,519,991 and \$510,469,820, respectively.

5. DERIVATIVE FINANCIAL INSTRUMENTS

A derivative financial instrument in very general terms refers to a security whose value is "derived" from the value of an underlying asset, reference rate or index.

The Fund has a variety of reasons to use derivative instruments, such as to attempt to protect the Fund against possible changes in the market value of its portfolio, manage the Fund's effective yield, foreign currency exposure, maturity and duration or generate potential gain. All of the Fund's holdings,

Edgar Filing: VAN KAMPEN HIGH INCOME CORPORATE BOND FUND - Form N-30D

including derivative instruments, are marked to market each day with the change in value reflected in unrealized appreciation/depreciation. Upon disposition, a realized gain or loss is recognized accordingly, except when taking delivery of a security underlying a futures or forward commitment. In these instances, the recognition of gain or loss is postponed until the disposal of the security underlying the futures or forward commitment.

Purchasing securities on a forward commitment involves a risk that the market value at the time of delivery may be lower than the agreed upon purchase price resulting in an unrealized loss. Selling securities on a forward commitment involves different risks and can result in losses more significant than those arising from the purchase of such securities. Risks may arise as a result of the potential inability of the counterparties to meet the terms of their contracts.

A forward foreign currency contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. Upon the settlement of the contract, a realized gain or loss is recognized and is included as a component of realized gain/loss on forwards. Risks may arise as a result of the potential inability of the counterparties to meet the terms of their contracts.

The following forward foreign currency contract was outstanding as of August 31, 2002:

	CURRENT VALUE	UNREALIZED APPRECIATION/ DEPRECIATION
SHORT CONTRACT:		
Euro Currency,		
\$9,975,000 expiring 10/28/02.....	\$9,758,548	\$(40,204)

6. DISTRIBUTION AND SERVICE PLANS

With respect to its Class A Shares, Class B Shares and Class C Shares, the Fund and its shareholders have adopted a distribution plan pursuant to Rule 12b-1 under the 1940 Act, as amended, and a service plan (collectively the "Plans"). The Plans govern payments for: the distribution of the Fund's Class A Shares, Class B Shares and Class C Shares; the provision of ongoing shareholder services with respect to such classes of shares; and maintenance of shareholder accounts with respect to such classes of shares.

Annual fees under the Plans of up to .25% of Class A average daily net assets and 1.00% each for Class B and Class C average daily net assets are accrued daily. Included in these fees for the year ended August 31, 2002 are payments retained by Van Kampen of approximately \$1,798,600 and payments made to Morgan Stanley DW Inc., an affiliate of the Adviser, of approximately \$110,600.

REPORT OF INDEPENDENT AUDITORS

To the Shareholders and Board of Trustees of Van Kampen High Income Corporate Bond Fund

We have audited the accompanying statement of assets and liabilities, including the portfolio of investments, of Van Kampen High Income Corporate Bond Fund (the "Fund"), as of August 31, 2002, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the three years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. The financial highlights of the Fund for each of the two years in the period ended August 31, 1999 were audited by other auditors whose report dated October 6, 1999 expressed an unqualified opinion on those financial highlights.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights. Our procedures included confirmation of securities owned as of August 31, 2002 by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of the Fund at August 31, 2002, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the three years in the period then ended in conformity with accounting principles generally accepted in the United States.
