#### **PART IV OTHER INFORMATION**

On September 14, 2005, the Registrant and substantially all of its subsidiaries filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code, in the United States Bankruptcy Court for the Southern District of New York. The reorganization cases are being jointly administered under the caption *In re Delta Air Lines, Inc., et al.*, Case No. 05-17923-PCB.

In accordance with GAAP, the Registrant has applied the provisions of American Institute of Certified Public Accountants' Statement of Position 90-7, *Financial Reporting by Entities in Reorganization Under the Bankruptcy Code* (SOP 90-7). SOP 90-7 requires that the financial statements, for periods subsequent to the Chapter 11 filing, distinguish transactions and events that are directly associated with the reorganization from the operations of the business. Accordingly, certain items of income, expense, gain, or loss realized or incurred because we are in Chapter 11 are recorded in reorganization items.

The Registrant will report an unaudited consolidated net loss of \$1.1 billion for the September 2005 quarter (\$6.73 diluted loss per share), compared to a net loss of \$646 million (\$5.16 diluted loss per share) in the September 2004 quarter. The net loss for the three months ended September 30, 2005 and 2004 includes net charges of \$692 million and \$54 million, respectively. These net charges reflect (1) a net charge of \$607 million for reorganization items in the September 2005 quarter and (2) a net charge of \$85 million in the September 2005 quarter and \$54 million in the September 2004 quarter for pension settlements, asset writedowns, restructuring and related items, net.

Operating revenues totaled \$4.2 billion in the September 2005 quarter, a 9% increase compared to the September 2004 quarter. Passenger revenues increased 9% to \$3.9 billion, reflecting a 7% increase in RPMs on a capacity increase of 5% and a 2% increase in passenger mile yield to 11.97¢. Passenger Revenue per Available Seat Mile (Passenger RASM) increased 4% to 9.48¢, while load factor increased 1.6 points to 79.2%. The increases in passenger mile yield reflect the Registrant's recent fare increases.

Operating expenses were \$4.5 billion for the September 2005 quarter compared to \$4.3 billion for the September 2004 quarter. The increase in operating expenses was primarily due to significantly higher fuel prices in 2005 than in 2004. Operating capacity increased 5% primarily due to operational efficiencies from the redesign of the Atlanta hub from a banked to a continuous hub, which allowed an increase to system-wide capacity with no additional Mainline aircraft. Operating cost per available seat mile (CASM) decreased 1% to 10.86¢.

The Registrant will report an unaudited consolidated net loss of \$2.6 billion for the nine months ended September 30, 2005 (\$17.07 diluted loss per share), compared to a net loss of \$3.0 billion (\$24.06 diluted loss per share) for the nine months ended September 30, 2004. The net loss for the nine months ended September 30, 2005 and 2004 includes net charges of \$1.2 billion and \$1.5 billion, respectively. These net charges reflect (1) a net charge of \$712 million and \$171 million for the nine months ended September 30, 2005 and 2004, respectively, for pension settlements, asset writedowns, restructuring and related items, net; (2) a \$607 million net charge for reorganization items for the nine months ended September 30, 2005; and (3) a \$139 million income tax benefit and a \$1.3 billion income tax provision for the nine months ended September 30, 2005 and 2004, respectively.

Operating revenues totaled \$12.0 billion for the nine months ended September 30, 2005, a 6% increase compared to the nine months ended September 30, 2004. Passenger revenue increased 6% to \$11.1 billion, reflecting an 8% rise in RPMs on a capacity increase of 5% and a 2% decline in passenger mile yield to 12.03¢. Passenger RASM increased 1% to 9.3¢, while load factor increased 2.3 points to 77.4%. The decline

in passenger mile yield reflects the Registrant's lack of pricing power due to the continuing growth of low-cost carriers with which it competes in most of its domestic markets, partially offset by recent fare increases. High industry capacity and increased price sensitivity by the Registrant's customers, enhanced by the availability of airline fare information on the Internet also contributed to the decline in passenger mile yield.

Operating expenses were \$13.4 billion for the nine months ended September 30, 2005, compared to \$12.4 billion for the nine months ended September 30, 2004. The increase in operating expenses was primarily due to significant increases in (1) fuel prices and (2) pension settlements, asset writedowns, restructuring and related items, net offset by a decrease in salaries and related costs. Operating capacity increased 5% to 119.4 billion ASMs primarily due to operational efficiencies from the redesign of our Atlanta hub from a banked to a continuous hub, which allowed us to increase system-wide capacity with no additional Mainline aircraft. CASM increased 2% to 11.20¢.
