☐ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2007

○ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number 0-23320

OLYMPIC STEEL, INC.

(Exact name of registrant as specified in its charter)

Ohio

34-1245650

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification Number)

5096 Richmond Road, Bedford Heights, Ohio

44146

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number, including area code (216) 292-3800

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares of each of the issuer's classes of common stock, as of the latest practicable date:

Class	Outstanding as of November 7, 2007
Common stock, without par value	10,727,586

Table of Contents

Olympic Steel, Inc.
Notes to Consolidated Financial Statements
September 30, 2007

(1) Basis of Presentation:

The accompanying consolidated financial statements have been prepared from the financial records of Olympic Steel, Inc. and its wholly-owned subsidiaries (collectively Olympic or the Company), without audit and reflect all normal and recurring adjustments which are, in the opinion of management, necessary to fairly present the results of the interim periods covered by this report. Year-to-date results are not necessarily indicative of 2007 annual results and these financial statements should be read in conjunction with the Company's 2006 Annual Report on Form 10-K for the period ended December 31, 2006. All significant intercompany transactions and balances have been eliminated in consolidation.

(2) Accounts Receivable:

The Company maintained allowances for doubtful accounts and unissued credits of \$2.7 million and \$3.3 million at September 30, 2007 and December 31, 2006, respectively. The allowance for doubtful accounts is maintained at a level considered appropriate based on historical experience and specific customer collection issues that have been identified. Estimations are based upon a calculated percentage of accounts receivable, which remains fairly level from year to year, and judgments about the probable effects of economic conditions on certain customers, which can fluctuate significantly from year to year. The Company cannot guarantee that the rate of future credit losses will be similar to past experience. The Company considers all available information when assessing each quarter the adequacy of its allowance for doubtful accounts.

6 of 33

Table of Contents**(3) Inventories:**

Steel inventories consist of the following:

(in thousands)	September 30, 2007	December 31, 2006
Unprocessed	\$ 124,011	\$ 159,581
Processed and finished	48,486	51,157
Totals	\$ 172,497	\$ 210,738

(4) Investments in Joint Ventures:

The Company and the United States Steel Corporation (USS) each own 50% of Olympic Laser Processing (OLP), a company that produced laser welded sheet steel blanks for the automotive industry. In January 2006, the Company and USS announced the closing of OLP. In conjunction with the closing, during the fourth quarter of 2005, the Company recorded a \$3.5 million charge for the disposition of the joint venture, consisting of \$1.3 million for the impairment of the Company's investment in OLP and a then-estimated \$2.2 million to be paid pursuant to the Company's guarantee of OLP's debt. OLP ceased operations during the first quarter of 2006. Operating losses incurred by OLP during the first quarter of 2006 were recorded against the \$3.5 million reserve. During the second and third quarters of 2006, OLP began liquidating its remaining assets. Offers from third parties to purchase the remaining assets were less than anticipated and the Company recorded an additional \$2.0 million charge in the second quarter of 2006 to reflect additional expected obligations under the guarantee of OLP's debt. In December 2006, the Company and USS each advanced \$3.2 million to OLP in connection with a loan guarantee. The Company believes the underlying value of OLP's remaining assets, upon liquidation, will be sufficient to repay the advance at a later date. The Company recorded 50% of OLP's net income or loss to its Consolidated Statement of Operations as Income (Loss) from Joint Ventures.

Table of Contents

Prior to May 1, 2006, the Company held a 49% ownership interest in G.S.P., LLC (GSP), a venture to support the flat-rolled steel requirements of the automotive industry as a Minority Business Enterprise. In order to gain full control of GSP, on May 1, 2006, the Company purchased the remaining 51% ownership interest for \$100 thousand and GSP ceased qualification as a Minority Business Enterprise.

During 2006, all of GSP's bank debt was extinguished, thereby eliminating the Company's 49% guarantee of GSP's demand note bank agreement.

Since May 1, 2006, GSP's results have been fully consolidated in the Company's financial statements. Prior to May 1, 2006, the Company, using the equity method of accounting, recorded 49% of GSP's net income or loss to its Consolidated Statements of Operations as Income (Loss) from Joint Ventures.

(5) Acquisition of Tinsley Group PS&W, Inc.:

In order to further expand value-added and fabrication capabilities, on June 2, 2006, the Company purchased all of the outstanding stock of Tinsley Group PS&W, Inc. (PS&W) for a final purchase price of \$9.0 million, which included \$6.6 million of goodwill. The results of PS&W have been fully consolidated in the Company's financial results since June 2, 2006.

PS&W is a full service fabricating company located in North Carolina that utilizes burning, forming, machining, welding and painting to produce a wide variety of fabrications for large original equipment manufacturers of heavy construction equipment.

(6) Debt:

The Company's secured bank-financing agreement (the Credit Facility) is a revolving credit facility collateralized by the Company's accounts receivable, inventories, and substantially all of its property and equipment. Borrowings are limited to the lesser of a borrowing base, comprised of eligible receivables and inventories or, effective with a July 2007 amendment, \$130 million in the aggregate. An April 2007 amendment extended the maturity date of the Credit Facility to December 15, 2010, with annual extensions at the bank's option. The Company has the option to borrow based on the agent's base rate or Eurodollar Rates (EURO) plus a premium.

Table of Contents

The Credit Facility requires the Company to comply with various covenants, the most significant of which include: (i) minimum availability of \$10 million, tested monthly, (ii) a minimum fixed charge coverage ratio of 1.25, and a maximum leverage ratio of 1.75, which are tested quarterly, (iii) restrictions on additional indebtedness, and (iv) limitations on dividends, capital expenditures and investments. At September 30, 2007, the Company had approximately \$101 million of availability under the Credit Facility and the Company was in compliance with its covenants. The Credit Facility also contains an accordion feature which allows the Company to add up to \$25 million of additional revolver capacity in certain circumstances.

Outstanding checks are included as part of Accounts Payable on the accompanying Consolidated Balance Sheets and such checks totaled \$16.7 million as of September 30, 2007 and \$16.9 million as of December 31, 2006.

(7) Shares Outstanding and Earnings Per Share:

Earnings per share have been calculated based on the weighted average number of shares outstanding as set forth below:

(in thousands, except per share data)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2007	2006	2007	2006
Weighted average shares outstanding	10,727	10,429	10,595	10,368
Assumed exercise of stock options and issuance of stock awards	94	234	152	261
Weighted average diluted shares	10,821	10,663	10,747	10,629
Net income	\$ 6,029	\$ 10,935	\$ 20,727	\$ 27,287
Basic earnings per share	\$ 0.56	\$ 1.05	\$ 1.96	\$ 2.63
Diluted earnings per share	\$ 0.56	\$ 1.03	\$ 1.93	\$ 2.57

(8) Stock Options:

In January 1994, the Olympic Steel, Inc. Stock Option Plan (Option Plan) was adopted by the Board of Directors and approved by the shareholders of the Company. Pursuant to the provisions of the Option Plan, key employees of the Company, non-employee directors and

Table of Contents

consultants may be offered the opportunity to acquire shares of Common Stock by the grant of stock options, including both incentive stock options (ISOs) and nonqualified stock options. ISOs are not available to non-employee Directors or consultants. A total of 1,300,000 shares of Common Stock were originally reserved for issuance under the Option Plan. To the extent possible, shares of treasury stock are used to satisfy shares resulting from the exercise of stock options. The purchase price of a share of Common Stock pursuant to an ISO will not be less than the fair market value of a share of Common Stock at the grant date. Options vest over periods ranging from six months to five years and all expire 10 years after the grant date.

The Option Plan terminates on January 5, 2009. Termination of the Option Plan will not affect outstanding options. As of September 30, 2007, there were no remaining shares of Common Stock available for grant under the Option Plan. On January 1, 2006, the Company adopted the provisions of Statement of Financial Accounting Standards No. 123-R, *Share-Based Payment* (SFAS No. 123-R), and elected to use the modified prospective transition method. The modified prospective transition method requires that compensation cost be recognized in the financial statements for all awards granted after the date of adoption as well as for existing awards for which the requisite service has not been rendered as of the date of the adoption. The modified prospective transition does not require prior periods to be restated. Prior to the adoption of SFAS No. 123-R, the Company accounted for stock-based compensation using the intrinsic value method prescribed in Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees, and related Interpretations. The Company has elected to use the short-cut method to calculate the historical pool of windfall tax benefits upon adoption of SFAS No. 123-R. The election to use the short-cut method had no effect on the Company's financial statements.

Under the intrinsic value method used prior to January 1, 2006, compensation expense for stock-based compensation was not recognized in the Company's Consolidated Statements of Operations as all stock options granted by the Company had an exercise price equal or greater than the market value of the underlying Common Stock on the option grant date. The adoption of SFAS No. 123-R resulted in the following:

10 of 33

Table of Contents

(in thousands, except per share data)	For the Three Months		For the Nine Months Ended September	
	Ended September 30,		30,	
	2007	2006	2007	2006
Stock option expense before taxes	\$ 53	\$ 8	\$ 97	\$ 120
Stock option expense after taxes	33	5	60	74
Impact per basic share	\$	\$	\$ 0.01	\$ 0.01
Impact per diluted share	\$	\$	\$ 0.01	\$ 0.01

All pre-tax charges related to stock options were included in the caption Administrative and General on the accompanying Consolidated Statement of Operations.

The fair value of each option grant was estimated as of the date of grant using the Black-Scholes option pricing model with the following weighted average assumptions:

	2007	2006
Risk-free interest rate	4.58%	N/A
Expected life in years	10	N/A
Expected volatility	57.7%	N/A
Expected dividend yield	0.4%	N/A

The expected volatility assumption was derived by referring to changes in the Company's historical Common Stock prices over a timeframe similar to that of the expected life of the award.

No options were granted during 2006. Options to purchase 24,170 shares of Common Stock were granted during the second quarter of 2007. The weighted-average fair value of options granted during 2007 was \$22.55.

The following table summarizes stock-based award activity during the nine months ended September 30, 2007:

Table of Contents

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (in thousands)
Outstanding at December 31, 2006	477,140	\$ 6.12		
Granted	24,170	32.63		
Exercised	(297,503)	4.94		
Canceled				
Outstanding at September 30, 2007	203,807	\$ 10.99	5.7 years	\$ 3,429
Exercisable at September 30, 2007	171,637	\$ 7.98	5.0 years	\$ 3,293

The total intrinsic value of stock options exercised during the nine months ended September 30, 2007 and 2006 were \$8.4 million and \$6.3 million, respectively. Net cash proceeds from the exercise of stock options were \$1.5 million and \$1.6 million for the nine months ended September 30, 2007 and 2006, respectively. Income tax benefits of \$3.2 million and \$2.4 million were realized from stock option exercises during the nine months ended September 30, 2007 and 2006, respectively. The fair value of options vested during the nine months ended September 30, 2007 and 2006 totaled \$97 thousand and \$139 thousand, respectively.

As of September 30, 2007, approximately \$534 thousand of expense, before taxes, with respect to non-vested stock-based awards has yet to be recognized and will be amortized into expense over a weighted-average period of 1.77 years.

(9) Restricted Stock Units and Performance Share Units:

At the Annual Meeting of Shareholders held on April 27, 2007, the shareholders of the Company approved the Olympic Steel 2007 Omnibus Incentive Plan (the Plan). The Plan authorizes the Company to grant stock options, stock appreciation rights, restricted shares, restricted share units, performance shares, and other stock- and cash-based awards to employees and Directors of, and consultants to, the Company and its affiliates. Under the plan, 500,000 shares of Common Stock are available for equity grants.

On May 1, 2007, the Compensation Committee of the Company's Board of Directors approved the grant of 1,800 restricted stock units (RSU) to each non-employee Director. Subject to the terms of the Plan and the RSU Agreement, the RSUs vest at the end of 2007. The RSUs are not converted into shares of Common Stock until the Board member either resigns or is terminated from the Board of Directors.

Table of Contents

On May 1, 2007, the Compensation Committee of the Company's Board of Directors also granted 32,378 performance-earned restricted stock units (PERSU) to the senior management of the Company. The PERSUs may be earned based on the Company's performance over a 32-month period, beginning May 1, 2007, and would be converted to shares of Common Stock in 2010, based on the achievement of two separate financial measures: (1) the Company's EBITDA (50% weighted); and (2) return on invested capital (50% weighted). No shares will be earned unless the threshold amounts for the performance measures are met. Up to 150% of the targeted amount of PERSUs may be earned.

The following table summarizes the activity related to RSUs and PERSUs for the nine months ended September 30, 2007:

	Number of Shares
Unvested as of January 1, 2007	
Granted	41,378
Vested	
Forfeited	
Unvested as of September 30, 2007	41,378

Under SFAS No. 123-R, stock compensation expense recognized on RSUs and PERSUs is summarized in the following table:

(in thousands, except per share data)	For the Three Months		For the Nine Months Ended September	
	Ended September 30,		30,	
	2007	2006	2007	2006
Stock award expense before taxes	\$ 292	\$	\$ 431	\$
Stock award expense after taxes	179		267	
Impact per basic share	\$ 0.02	\$	\$ 0.03	\$
Impact per diluted share	\$ 0.02	\$	\$ 0.03	\$

All pre-tax charges related to RSUs and PERSUs were included in the caption, Administrative and General on the accompanying Consolidated Statement of Operations.

Table of Contents

(10) Supplemental Cash Flow Information:

Interest paid during the first nine months of 2007 totaled \$3.0 million, compared to \$1.1 million in the first nine months of 2006. Income taxes paid during the first nine months of 2007 and 2006 totaled \$9.1 million and \$17.2 million, respectively.

(11) Impact of Recently Issued Accounting Pronouncements:

In July 2006, the FASB issued Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes: an interpretation of FASB Statement No. 109. This interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. FIN 48 prescribes a recognition threshold and measurement principles for financial statement disclosure of tax positions taken or expected to be taken on a tax return. The Company adopted FIN 48 on January 1, 2007. The adoption had no effect on the opening balance of retained earnings as of January 1, 2007.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157 (SFAS No. 157), Fair Value Measurements. This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007. We do not expect the adoption of SFAS No. 157 will have a material impact on our consolidated financial statements.

Table of Contents

Item 2. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

The following discussion and analysis should be read in conjunction with our unaudited consolidated financial statements and accompanying notes contained herein and our consolidated financial statements, accompanying notes and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2006. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of many factors, including those described in Item 1A, Risk Factors, of our Annual Report on Form 10-K and under the caption "Forward-Looking Information" below.

Overview

We are a leading U.S. steel service center with over 50 years of experience. Our primary focus is on the direct sale and distribution of large volumes of processed carbon, coated and stainless flat-rolled sheet, coil and plate products. We act as an intermediary between steel producers and manufacturers that require processed steel for their operations. We serve customers in most carbon steel consuming industries, including manufacturers and fabricators of transportation and material handling equipment, automobiles, construction and farm machinery, storage tanks, environmental and energy generation, and electrical equipment, as well as general and plate fabricators, and steel service centers. We distribute our products primarily through a direct sales force.

We operate as a single business segment with 16 strategically-located processing and distribution facilities in Connecticut, Georgia, Illinois, Iowa, Michigan, Minnesota, North Carolina, Ohio and Pennsylvania. This geographic footprint allows us to focus on regional customers and larger national and multi-national accounts, primarily located throughout the midwestern, eastern and southern United States.

We sell a broad range of steel products, many of which have different gross profits and margins. Products that have more value-added processing generally have a greater gross profit and higher margins. Accordingly, our overall gross profit is affected by, among other things, product mix, the amount of processing performed, the availability of steel, volatility in selling prices and

Table of Contents

material purchase costs. We also perform toll processing of customer-owned steel, the majority of which is performed by our Detroit and Georgia operations. We sell certain products internationally, primarily in Puerto Rico and Mexico. All international sales and payments are made in United States dollars. Recent international sales have been immaterial to our consolidated financial results.

Our results of operations are affected by numerous external factors including, but not limited to, general and global business, economic and political conditions, competition, steel pricing and availability, energy prices, pricing and availability of raw materials used in the production of steel, customer demand for steel, customers' ability to manage their credit line availability and layoffs or work stoppages by our own, our suppliers' or our customers' personnel. The steel industry also continues to be affected by the global consolidation of our suppliers, competitors, and end-use customers.

On May 1, 2006, we acquired the remaining 51% interest in our GSP joint venture. Prior to May 1, 2006, our 49% interest in GSP was accounted for under the equity method. Since May 1, 2006, the results of GSP have been fully consolidated into our financial statements. In January 2006, we announced plans to close the OLP joint venture in Detroit, Michigan. OLP, which was a processor of laser welded steel blanks for the automotive industry, ceased operations in the first quarter of 2006. Our 50% interest in OLP is accounted for under the equity method.

In June 2006, we acquired all of the outstanding stock of PS&W, a North Carolina-based fabricator of heavy construction equipment components. Since June 2, 2006, the results of PS&W have been fully consolidated into our financial statements.

A collective bargaining agreement covering approximately five Detroit maintenance workers expired July 31, 2007. Employees covered under this agreement continue to operate as a new agreement is negotiated. While we expect to be able to negotiate a new agreement, there can be no assurances that such resolution will occur. Collective bargaining agreements covering our Minneapolis and other Detroit employees expire in 2009 and subsequent years. We have never experienced a work stoppage and we believe that our relationship with employees is good. However, any prolonged work stoppages by our personnel represented by collective bargaining units could have a material adverse impact on our business, financial condition, results of operations, and cash flows.

Table of Contents

Critical Accounting Policies

This discussion and analysis of financial condition and results of operations is based on our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and assumptions that affect the amounts reported in the financial statements. Actual results could differ from these estimates under different assumptions or conditions. On an ongoing basis, we monitor and evaluate our estimates and assumptions.

For further information regarding the accounting policies that we believe to be critical accounting policies and that affect our more significant judgments and estimates used in preparing our consolidated financial statements, see Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2006.

Table of Contents**Results of Operations**

The following table sets forth certain income statement data for the three and nine months ended September 30, 2007 and 2006 (dollars are shown in thousands):

	For the Three Months Ended September 30,				For the Nine Months Ended September 30,			
	2007		2006		2007		2006	
	\$	% of net sales	\$	% of net sales	\$	% of net sales	\$	% of net sales
Net sales	\$ 256,089	100.0%	\$ 259,917	100.0%	\$ 792,907	100.0%	\$ 754,943	100.0%
Gross profit (1)	50,383	19.7%	58,366	22.5%	153,441	19.4%	158,884	21.0%
Operating expenses(2)	39,705	15.5%	39,615	15.2%	117,482	14.8%	111,257	14.7%
Operating income	\$ 10,678	4.2%	\$ 18,751	7.2%	\$ 35,959	4.5%	\$ 47,627	6.3%

(1) Gross profit is calculated as net sales less the cost of materials sold, exclusive of depreciation.

(2) Operating expenses are calculated as total costs and expenses less the cost of materials sold.

Tons sold decreased 1.4% to 309 thousand in the third quarter of 2007 from 313 thousand in the third quarter of 2006. Tons sold in the third quarter of 2007 included 272 thousand from direct sales and 37 thousand from toll processing, compared with 264 thousand direct tons and 49 thousand toll tons in the comparable period of last year. Tons sold decreased 3.8% to 957 thousand in the first nine months of 2007 from 994 thousand in the first nine months of 2006. Tons sold in the first nine months of 2007 included 842 thousand direct tons and 115 thousand from toll processing, compared with 834 thousand direct tons and 160 thousand toll tons in the comparable period last year. The decrease in tons sold was primarily attributable to lower toll processing sales to domestic automotive customers. Tons sold in the fourth quarter of 2007 are expected to be lower than third quarter 2007 levels due to normal seasonal patterns. Net sales decreased 1.5% to \$256.1 million in the third quarter of 2007 from \$259.9 million in the third quarter of 2006. Net sales increased 5.0% to \$792.9 million in the first nine months of 2007 from \$754.9 million in the first nine months of 2006. Total average selling prices for the third quarter of 2007 remained flat with last year's third quarter and with the second quarter of 2007. Higher sales in 2007 is attributable to a higher mix of year-to-date direct tons sold than tolling tons sold.

As a percentage of net sales, gross profit (exclusive of depreciation) decreased to 19.7% in the third quarter of 2007 from 22.5% in the third quarter of 2006. For the first nine months of 2007, gross margin decreased to 19.4% from 21.0% in the first nine months of 2006. Due to normal

Table of Contents

seasonal patterns, a decrease in customer demand could lead to more competition for sales, which could reduce our selling prices and our gross margin levels in the fourth quarter of 2007.

Operating expenses in the third quarter of 2007 remained flat with last year's third quarter. Operating expenses in the first nine months of 2007 increased 5.6% to \$117.5 million from \$111.3 million during the first nine months of 2006. The increase in operating expenses was primarily attributable to the inclusion of PS&W's operating expenses in 2007 results and the costs associated with the implementation of our new information system, which commenced during the third quarter of 2006. As a percentage of net sales, operating expenses increased to 15.5% for the third quarter of 2007 from 15.2% in the comparable 2006 period. Operating expenses during the first nine months of 2007 increased to 14.8% from 14.7% in the comparable 2006 period.

Financing costs totaled \$640 thousand for the third quarter of 2007 compared to \$898 thousand for the third quarter of 2006. Financing costs totaled \$2.5 million for the first nine months of 2007, compared to \$1.4 million for the first nine months of 2006. Our effective borrowing rate, inclusive of deferred financing fees and commitment fees, for the first nine months of 2007 was 7.3% compared to 7.8% in the first nine months of 2006. We expect our borrowing costs to decrease in the fourth quarter of 2007 due to lower market interest rates and lower outstanding borrowings.

For the third quarter of 2007, income before income taxes totaled \$10.0 million compared to \$17.9 million in the third quarter of 2006. For the first nine months of 2007, income before taxes totaled \$33.4 million, compared to \$44.1 million in the first nine months of 2006. An income tax provision of 38.0% was recorded for the first nine months of 2007, compared to a provision of 38.1% for the first nine months of 2006. We expect the effective tax rate to approximate 38% for the remainder of 2007. Income taxes paid totaled \$9.1 million and \$17.2 million for the first nine months of 2007 and 2006, respectively.

Net income for the third quarter of 2007 totaled \$6.0 million or \$.56 per diluted share, compared to net income of \$10.9 million or \$1.03 per diluted share for the third quarter of 2006. Net income for the first nine months of 2007 totaled \$20.7 million or \$1.93 per diluted share, compared to net income of \$27.3 million or \$2.57 per diluted share for the first nine months of 2006.

Table of Contents

Liquidity and Capital Resources

Our principal capital requirements include funding working capital needs, purchasing and upgrading processing equipment and facilities, acquisitions, and paying dividends. We use cash generated from operations, leasing transactions, and our revolving credit facility to fund these requirements.

Working capital at September 30, 2007 totaled \$194.1 million, a \$21.8 million decrease from the end of the prior year. Significant working capital changes included a \$38.2 million decrease in inventories and an \$8.7 million increase in accounts payable (including outstanding checks), partially offset by a \$23.2 million increase in accounts receivable. Historically, accounts receivable levels have been lowest at the end of each calendar year, due to normal seasonal patterns.

For the nine months ended September 30, 2007, we generated \$50.2 million of net cash from operations, of which \$26.3 million was derived from cash earnings and \$23.9 million was generated from working capital.

During the first nine months of 2007, we spent \$8.3 million on capital expenditures. We have completed a \$2.9 million project to expand our Iowa facility by approximately 54,000 square feet in order to meet our customers need for high quality sheet product. We have also installed additional laser and plasma cutting equipment and machining centers in Cleveland, Chicago and Chambersburg to support our growing value-added services. Due to the risk of technological obsolescence, it has been our policy to lease new laser cutting equipment. In early 2008, a \$5.5 million stretcher-leveler cut-to-length line in Minneapolis will become operational. In July 2006, we announced the beginning of a project to implement a new single information system to replace the three systems we currently use. The objective is to standardize and streamline business processes and improve support for our growing service center and fabrication business. The project will require a significant deployment of capital and will require a significant use of management's time. The total external costs associated with the new information system are expected to approximate \$14 million over a three-year phased implementation that began in July 2006. We expect to increase our capital spending in 2008 to further support our value-added strategies in both existing and new facilities.

Table of Contents

During the first nine months of 2007, we used \$39.9 million for financing activities, which primarily consisted of \$43.3 million revolver borrowing repayments, partially offset by \$4.7 million of proceeds from the exercise of stock options.

In October 2007, our Board of Directors approved a regular quarterly dividend of \$.04 per share, which is payable on December 17, 2007 to shareholders of record as of December 3, 2007. Our Board of Directors previously approved dividends of \$.03 per share, which were paid on March 15, 2007 and June 15, 2007 and \$.04 per share paid on September 17, 2007. We expect to make regular dividend distributions in the future, subject to the availability of cash and continuing determination by our Board of Directors that the payment of dividends remains in the best interest of our shareholders.

Our secured bank-financing agreement (the Credit Facility) is a revolving credit facility collateralized by our accounts receivable, inventories, and substantially all of our property and equipment. Borrowings are limited to the lesser of a borrowing base, comprised of eligible receivables and inventories or, effective with a July 2007 amendment, \$130 million in the aggregate. An April 2007 amendment extended the maturity date of the Credit Facility to December 15, 2010, with annual extensions at the banks' option.

The Credit Facility requires us to comply with various covenants, the most significant of which include: (i) minimum availability of \$10 million, tested monthly, (ii) a minimum fixed charge coverage ratio of 1.25, and a maximum leverage ratio of 1.75, which are tested quarterly, (iii) restrictions on additional indebtedness, and (iv) limitations on dividends, capital expenditures and investments. At September 30, 2007, we had approximately \$101 million of availability under our Credit Facility and we were in compliance with our covenants. The Credit Facility also contains an accordion feature which allows us to add up to \$25 million of additional revolver capacity in certain circumstances. We believe that funds available under our Credit Facility and lease arrangements, together with funds generated from operations, will be sufficient to provide us with the liquidity necessary to fund anticipated working capital requirements and capital expenditure requirements over the next 12 months. In the future, we may, as part of our business strategy, acquire and dispose of other companies in the same or complementary lines of business, enter into and exit strategic alliances and joint ventures, and pursue other business ventures. Accordingly, the timing and size of our capital requirements are subject to change as business conditions warrant and opportunities arise.

Table of Contents

Forward-Looking Information

This Quarterly Report on Form 10-Q and other documents we file with the SEC contain various forward-looking statements that are based on current expectations, estimates, forecasts and projections about our future performance, business, our beliefs and management's assumptions. In addition, we, or others on our behalf, may make forward-looking statements in press releases or written statements, or in our communications and discussions with investors and analysts in the normal course of business through meetings, conferences, webcasts, phone calls and conference calls. Words such as may, will, anticipate, should, intend, expect, believe, estimate, project, continue, as well as the negative of these terms or similar expressions are intended to identify forward-looking statements, which are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such statements are subject to certain risks, uncertainties and assumptions including, but not limited to those set forth in Item 1A, Risk Factors, as found in our Annual Report on Form 10-K for the year ended December 31, 2006 and the following:

general and global business, economic and political conditions;

competitive factors such as availability and pricing of steel, industry inventory levels and rapid fluctuations in customer demand and pricing;

the cyclical and volatility within the steel industry;

the ability of customers (especially in the domestic automotive industry) to maintain their credit availability;

customer, supplier, and competitor consolidation, bankruptcy or insolvency;

layoffs or work stoppages by our own or our suppliers' or customers' personnel;

the availability and costs of transportation and logistical services;

equipment malfunctions or installation delays;

the amounts and successes of our capital investments;

the successes of our strategic efforts and initiatives to increase sales volumes, maintain cash turnover, maintain or improve inventory turns and reduce costs;

the adequacy of our information technology and business system software;

the successful implementation of our new information system;

the timing and outcome of OLP's efforts and ability to liquidate its remaining real estate; and

our ability to pay regular quarterly cash dividends.

Table of Contents

Should one or more of these, or other risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, intended expected, believed, estimated, projected or planned. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. We undertake no obligation to republish revised forward-looking statements to reflect the occurrence of unanticipated events of circumstances after the date hereof, except as otherwise required by law.

Item 3. Qualitative and Quantitative Disclosures About Market Risk

During the past several years, the base price of carbon and stainless flat-rolled steel has fluctuated significantly. Declining prices could reduce our gross profit margin percentages to levels that are lower than our historical levels. Higher levels of inventory held by us, other steel service centers, or end-use customers could cause competitive pressures which could also reduce gross margins. Higher raw material costs for steel producers could cause the price of steel to increase. While we have generally been successful in the past in passing on producers price increases and surcharges to our customers, there is no guarantee that we will be able to pass on price increases to our customers in the future.

Approximately 8.5% of our net sales in the first nine months of 2007 were directly to automotive manufacturers or manufacturers of automotive components and parts. The automotive industry experiences significant fluctuations in demand based on numerous factors such as general economic conditions and consumer confidence. The automotive industry is also subject, from time to time, to labor work stoppages. The domestic automotive industry, which has experienced a number of bankruptcies, is currently involved in significant restructuring and labor contract negotiations, which has resulted in lower production volumes. Certain customers in this industry represent an increasing credit risk.

Inflation generally affects us by increasing the cost of employee wages and benefits, transportation services, processing equipment, purchased steel, energy and borrowings under our credit facility. General inflation has not had a material effect on our financial results during the past two years; however, we have experienced increased distribution expense as a result of higher fuel costs.

Table of Contents

When raw material prices increase, competitive conditions will influence how much of the steel price increase can be passed on to our customers. When raw material prices decline, customer demands for lower costed product result in lower selling prices. Declining steel prices have generally adversely affected our net sales and net income, while increasing steel prices favorably affect net sales and net income.

We are exposed to the impact of interest rate changes and fluctuating steel prices. We have not entered into any interest rate or steel commodity hedge transactions for speculative purposes or otherwise.

Our primary interest rate risk exposure results from variable rate debt. If interest rates in the future were to increase 100 basis points (1.0%) from September 30, 2007 rates and, assuming no change in total debt from September 30, 2007 levels, the additional annual interest expense to us would be approximately \$250 thousand. We currently do not hedge our exposure to variable interest rate risk. However, we do have the option to enter into 30- to 180- day fixed base rate EURO loans under the Credit Facility.

Item 4. Controls and Procedures

The evaluation required by Rule 13a-15 of the Securities Exchange Act of 1934 of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this Report have been carried out under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer. These disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed in reports that are filed with or submitted to the SEC is: (i) accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures; and (ii) recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of September 30, 2007, our disclosure controls and procedures were effective.

Table of Contents

There were no changes in our internal controls over financial reporting that occurred during the third quarter of 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
