NOTES TO CONSOLIDATED FINANCIAL INFORMATION

(Unaudited)

1. *General Information*

The unaudited consolidated financial information of Phelps Dodge Corporation (the Company, which may be referred to as Phelps Dodge, PD, we, us or ours) presented herein has been prepared in accordance with the instructions to Form 10-Q and does not include all of the information and note disclosures required by generally accepted accounting principles. Therefore, this information should be read in conjunction with the consolidated financial statements and notes thereto included in our Form 10-K for the year ended December 31, 2002. This information reflects all adjustments that are, in the opinion of management, necessary to a fair statement of the results for the interim periods reported. Our business consists of two divisions, Phelps Dodge Mining Company (PDMC) and Phelps Dodge Industries (PDI).

The results of operations for the quarter and six-month periods ended June 30, 2003, are not necessarily indicative of the results to be expected for the full year.

2. *Restatements*

In Note 1, Summary of Significant Accounting Policies, and Note 22, Restatement of Consolidated Financial Statements, in the Company's Form 10-K for the year ended December 31, 2002, we identified certain accounting matters in the fourth quarter of 2002 that required restatement of our December 31, 2001 and 2000, Consolidated Financial Statements and our financial information for the quarterly periods ended March 31, 2001, through September 30, 2002. Additionally, our presentation of reportable segment information for PDMC for the quarter and six months ended June 30, 2002, has been revised to reflect additional segments.

Following are summaries of selected unaudited quarterly financial data, as restated for the quarter and six months ended June 30, 2002: (Unaudited; \$ in millions except per share data)

	Second Quarter 2002		
	As Previously Reported	Adjust- ments	As Restated
Sales and other operating revenues	\$966.8		\$966.8
Operating loss	(15.8)	5.6	(10.2)
Loss before cumulative effect of accounting change	(36.4)	2.1	(34.3)
Net loss	(36.4)	2.1	(34.3)
Basic and diluted loss per common share before cumulative effect of accounting change	(0.48)	0.02	(0.46)
Basic and diluted loss per common share	(0.48)	0.02	(0.46)

Adjustments comprise the following:

- (1) To adjust the units-of-production depreciation rate calculation for PDMC's mining, smelting and refining operations. This change reduced our depreciation and amortization expense and reduced our operating loss by \$3.0 million in the second quarter of 2002. Additionally, this change decreased our net loss by \$2.4 million, or 3 cents per common share, in the second quarter of 2002.
- (2) To adjust the acquired reclamation obligations assumed in the Cyprus Amax Minerals Company acquisition. This change increased our cost of products sold and our operating loss by \$0.9 million in the second quarter of 2002. Additionally, this change increased our net loss by \$0.7 million, or 1 cent per common share, in the second quarter of 2002.
- (3)

Edgar Filing: PHELPS DODGE CORP - Form 10-Q

To adjust the estimated reclamation obligation at our Tyrone mine in 2002 to exclude mineralized material from the determination of the unit reclamation and closure accrual rate. This change increased both our cost of products sold and our operating loss and increased our net loss by \$2.1 million, or 3 cents per common share, in the second quarter of 2002.

- (4) To capitalize costs associated with material in mill and leach stockpiles and the consequent in-process material being converted to salable copper products, which were stated at lower of cost or market. This change decreased both our cost of products sold and our operating loss by \$5.6 million in the second quarter of 2002. Additionally, this change decreased our net loss by \$5.1 million, or 7 cents per common share, in the second quarter of 2002.
 - (5) In 2001, a deferred tax asset valuation allowance of \$57.9 million associated with our El Abra copper mine in Chile was established. The adjustment to the deferred tax asset caused an increase to our net loss by \$2.2 million, or 3 cents per common share, in the second quarter of 2002.
 - (6) The overall effect of the aforementioned adjustments resulted in an incremental income tax expense that increased our net loss by \$0.4 million, or 1 cent per common share, in the second quarter of 2002.
-

(Unaudited; \$ in millions except per share data)

**Six Months Ended
June 30, 2002**

	As Previously Reported	Adjust- ments	As Restated
Sales and other operating revenues	\$ 1,885.3		\$ 1,885.3
Operating income (loss)	(8.8)	11.3	2.5
Loss before cumulative effect of accounting change	(41.2)	5.0	(36.2)
Net loss	(64.1)	5.0	(59.1)
Basic and diluted loss per common share before cumulative effect of accounting change	(0.55)	0.07	(0.48)
Basic and diluted loss per common share	(0.84)	0.07	(0.77)

Adjustments comprise the following:

- (1) To adjust the units-of-production depreciation rate calculation for PDMC's mining, smelting and refining operations. This change reduced our depreciation and amortization expense and decreased our operating loss by \$5.7 million for the six months ended June 30, 2002. Additionally, this change decreased our net loss by \$4.6 million, or 6 cents per common share, for the six months ended June 30, 2002.
- (2) To adjust the acquired reclamation obligations assumed in the Cyprus Amax Minerals Company acquisition. This change increased both our cost of products sold and our operating loss by \$1.8 million for the six months ended June 30, 2002. Additionally, this change increased our net loss by \$1.5 million, or 2 cents per common share, for the six months ended June 30, 2002.
- (3) To adjust the estimated reclamation obligation at our Tyrone mine in 2002 to exclude mineralized material from the determination of the unit reclamation and closure accrual rate. This change increased our cost of products sold and our operating loss and net loss by \$4.2 million, or 5 cents per common share, for the six months ended June 30, 2002.
- (4) To capitalize costs associated with material in mill and leach stockpiles and the consequent in-process material being converted to salable copper products, which were stated at lower of cost or market. This change decreased our cost of products sold and our operating loss by \$11.6 million for the six months ended June 30, 2002. Additionally, this change decreased our net loss by \$10.7 million, or 14 cents per common share, for the six months ended June 30, 2002.
- (5) In 2001, a deferred tax asset valuation allowance of \$57.9 million associated with our El Abra copper mine in Chile was established. The adjustment to the deferred tax asset caused an increase to our net loss by \$4.2 million, or 5 cents per common share, for the six months ended June 30, 2002.
- (6) The overall effect of the aforementioned adjustments resulted in an incremental income tax expense that increased our net loss by \$0.4 million, or 1 cent per common share, for the six months ended June 30, 2002.

3. *Reclassification of Intangible Assets*

The Company has recently had discussions with the Staff of the Securities and Exchange Commission regarding the balance sheet classification of certain mining concessions, primarily mining concessions containing proven and probable ore reserves and mineralized material at the Company's South American mines, and whether such assets constitute tangible or intangible assets based upon certain guidance contained in Statement of Financial Accounting Standards (SFAS) No. 141, Business Combinations, and SFAS No. 142,

Goodwill and Other Intangible Assets. Historically the Company has classified such assets less the related accumulated depreciation, depletion and amortization, as Property, plant and equipment, net on its consolidated balance sheet. The Company has reclassified such mining concessions as intangible assets. Previously reported historical amounts also have been reclassified for comparative purposes. These assets will continue to be amortized over their respective useful lives. The reclassifications had no effect on the Company's net loss

Edgar Filing: PHELPS DODGE CORP - Form 10-Q

or shareholders' equity.

The following table summarizes the gross and net carrying amount of intangible assets at December 31, 2002, and June 30, 2003:

(Unaudited; \$ in millions)

	June 30, 2003	December 31, 2002
Gross carrying amount	\$ 443.6*	439.5
Less accumulated amortization	(109.0)*	(93.6)
	<u>\$ 334.6</u>	<u>345.9</u>

* Includes amounts for recording an asset retirement cost associated with the implementation of SFAS No. 143. (See Note 6, Accounting Standards, for further discussion.)

Amortization expense related to intangible assets was \$6.2 million and \$6.5 million for the three months ended June 30, 2003 and 2002, respectively, and \$13.4 million and \$13.1 million for the six months ended June 30, 2003 and 2002, respectively.

The estimated annual aggregate amortization expense for intangibles is as follows:

(Unaudited; \$ in millions)

2004	\$27.2
2005	27.3
2006	27.3
2007	27.4
2008	27.6

4. Stock Compensation

We account for our stock option plans by measuring compensation cost using the intrinsic-value-based method presented in Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations. No compensation cost is reflected in consolidated net loss, as all options granted under the plans had an exercise price equal to the market value of the underlying common stock on the date of the grant. The following table presents the effect on net loss and loss per common share as if we had applied the fair value recognition provisions of SFAS No. 123, Accounting for Stock-Based Compensation, to compensation cost. (Unaudited; \$ in millions except per share data)

5. *Special Items and Provisions*

Special items and provisions are unpredictable and atypical of the Company's operations in a given period. We believe consistent identification, disclosure and discussion of such items, both favorable and unfavorable, provide additional information to assess the quality of our performance and our earnings or losses. In addition, management measures the performance of its reportable segments excluding special items. This supplemental information is not a substitute for any U.S. generally accepted accounting principles (GAAP) measure and should be evaluated within the context of our U.S. GAAP results.

Note: Supplemental Data

In the 2002 second quarter, a special, net pre-tax loss of \$31.0 million was recognized consisting of (i) pre-tax charges of \$46.5 million (\$44.5 million after-tax) associated with an award made in a binding arbitration proceeding filed against Cyprus Amax Minerals Company (Cyprus Amax) by Plateau Mining Corporation (a former subsidiary of Cyprus Amax); (ii) an \$11.2 million charge including expenses (\$8.9 million after-tax) for the settlement of a lawsuit related to Amax Oil & Gas acquired with the Cyprus Amax purchase; (iii) a \$0.7 million loss on the write-off of a

-12-

cost investment; (iv) a \$22.6 million gain (before and after taxes) on the sale of a non-core parcel of real estate in New Mexico; and (v) a \$4.8 million net gain (\$3.8 million after-tax) from recoveries associated with insurance settlements on historic environmental claims. The taxes associated with special items were a net benefit of \$18.3 million, including release of deferred taxes previously provided (\$13.0 million) and year-to-date adjustments (\$2.0 million) reflecting refinements in forecast estimates of U.S. net operating loss carrybacks prior to 2002 (refer to Note 10, Benefit (Provision) for Taxes on Income).

In the 2002 first quarter, a special, net pre-tax loss of \$29.7 million was recognized consisting of (i) pre-tax charges of \$33.0 million (\$22.9 million after-tax) for the cumulative effect of an accounting change (refer to Note 6, Accounting Standards, for further discussion); (ii) a \$12.1 million charge (before and after taxes) for environmental provisions; (iii) a \$0.5 million (\$0.4 million after-tax) write-off of a cost-basis investment; and (iv) a \$15.9 million gain (\$13.1 million after-tax), net of fees and expenses, from recoveries associated with insurance settlements reached with companies on historic environmental claims. In addition, the 2002 first quarter included a tax benefit of \$38.5 million for net operating loss carryback prior to 2002 resulting from recent U.S. tax legislation (refer to Note 10, Benefit (Provision) for Taxes on Income).

In September 2002, we announced the temporary closure of two U.S. wire and cable plants and other actions to improve efficiencies and consolidate certain wire and cable operations. Refer to the Company's Form 10-K for the year ended December 31, 2002, for additional discussion.

The following schedule presents a roll-forward from December 31, 2002, of the liabilities incurred in connection with the September 2002 restructuring program, which were reflected as current liabilities in our consolidated balance sheet:

(Unaudited; \$ in millions)

	■	■	■

Note: In the 2003 second quarter, payments were \$(0.2) million.

In the second quarter of 2001, we announced a restructuring of our professional, administrative and operational support functions, as well as various other operational improvement initiatives. Also in the fourth quarter of 2001, we announced a series of actions to address the then-current economic environment, including changes in copper operations that led us to curtail approximately 220,000 metric tons of copper production annually (including our partner's share) and to curtail 54,000 metric tons of North American carbon black production annually in 2002. Additionally, in the second quarter of 2000 and 1999, we announced plans to reduce operating costs and restructure operations at our PDMC division and our Wire and Cable segment. Refer to the Company's Form 10-K for the year ended December 31, 2002, for additional discussion.

PDI's Wire and Cable segment reassessment related to a non-cash deduction resulting from the devaluation of Venezuelan currency.

6. Accounting Standards

On January 1, 2003, we adopted SFAS No. 143, Accounting for Asset Retirement Obligations. With the adoption of this Statement, we recognize asset retirement obligations (AROs) as liabilities when incurred, with the initial measurement at fair value. These liabilities will be accreted to full value over time through charges to income. In addition, an asset retirement cost was capitalized as part of the related asset's carrying value and will subsequently be depreciated over the asset's useful life. Our AROs consist primarily of costs associated with mine reclamation and closure activities. These activities, which tend to be site specific, generally include costs for earthwork, revegetation, water treatment and demolition. Upon adoption, we recorded an increase to our closure and reclamation reserve of approximately \$2.5 million, net, an increase to our mining properties assets of approximately \$12.2 million and a cumulative gain of \$8.4 million, net of deferred income taxes. For the three and six months ended June 30, 2003, the effect of adopting SFAS No. 143 decreased loss before cumulative effect of accounting change by approximately \$8 million, or 9 cents per common share, and \$11 million, or 12 cents per common share, respectively.

The following table summarizes the balance sheet impact associated with the adoption of SFAS No. 143:
(Unaudited; \$ in millions)

	December 31, 2002 As Reported*	SFAS No. 143 Adoption Impact	January 1, 2003 After Adoption
Mining properties	\$ 907.4	63.8**	971.2
Mining properties accumulated depreciation	(197.1)	(53.2)	(250.3)
Net mining properties assets	\$ 710.3	10.6	720.9

Effective January 1, 2002, the Company adopted SFAS No. 142, Goodwill and Other Intangible Assets. Under SFAS No. 142, goodwill and intangible assets that have indefinite useful lives are not amortized, but rather tested at least annually for impairment. Intangible assets that have finite useful lives will continue to be amortized over their useful lives. Upon completion of the transitional impairment tests, the fair value of three of the Company's international wire and cable reporting units was determined to be less than the related carrying amount. The resulting impairment loss recognized upon adoption of SFAS No. 142 in the first quarter of 2002 was \$33.0 million, pre-tax (\$22.9 million after-tax), and was recognized as a cumulative effect of a change in accounting principle.

Subsequently, the Company completed its annual goodwill impairment test as of December 31, 2002, with no additional impairments. The Company will continue to test its goodwill annually as of December 31, unless events occur or circumstances change between annual tests that would more likely than not reduce the fair value of a reporting unit below its carrying amount.

-17-

The changes in the carrying amount of goodwill for the year ended December 31, 2002, and six months ended June 30, 2003, were as follows:

(Unaudited; \$ in millions)

	Specialty Chemicals Segment	Wire and Cable Segment	Total

Balance as of December 31, 2002	69.1	21.6	90.7
Goodwill acquired during period			
Impairment losses			
Goodwill included in the disposal of a business unit			
Foreign currency translation adjustments	8.9		8.9
Balance as of June 30, 2003	\$ 78.0	21.6	99.6

In April 2002, FASB issued SFAS No. 145, Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections. Under SFAS No. 4, all gains and losses from extinguishment of debt were required to be aggregated and, if material, classified as an extraordinary item, net of related income tax effect. This Statement eliminates SFAS No. 4 and, thus, the exception to applying APB No. 30 to all gains and losses related to extinguishments of debt. As a result, gains and losses from extinguishment of debt should be classified as extraordinary items only if they meet the criteria in APB No. 30. Applying the provisions of APB No. 30 will distinguish transactions that are part of an entity's recurring operations from those that are unusual or infrequent or that meet the criteria for classification as an extraordinary item. Under SFAS No. 13, the required accounting treatment of certain lease modifications that have economic effects similar to sale-leaseback transactions was inconsistent with the required accounting treatment for sale-leaseback transactions. This Statement amends SFAS No. 13 to require that those lease modifications be accounted for in the same manner as sale-leaseback transactions. This Statement was adopted by the Company on January 1, 2003. As a result of this Statement being adopted, we will reclassify the third quarter 2002 extraordinary item for debt extinguishment to recurring operations in our Form 10-Q filing for the quarter ended September 30, 2003.

In June 2002, FASB issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities. This Statement addresses financial accounting and reporting for costs associated with exit or disposal activities and nullifies Emerging Issues Task Force (EITF) Issue No. 94-3, Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring). The principal difference between this Statement and EITF 94-3 relates to its requirements for recognition of a liability for a cost associated with an exit or disposal activity. This Statement requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred. Under EITF 94-3, a liability was recognized at the date of an entity's commitment to an exit plan. This Statement is effective for exit or disposal activities initiated after December 31, 2002.

In November 2002, FASB issued Interpretation No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others (FIN 45). FIN 45 requires that upon issuance of certain guarantees, a guarantor must recognize a liability for the fair value of an obligation assumed under the guarantee. FIN 45 also requires significant new disclosures by guarantors, in both interim and annual financial statements, about obligations associated with guarantees issued. FIN 45 disclosure requirements were adopted for our year ended December 31, 2002; the initial recognition and measurement provisions were adopted on a prospective basis to guarantees issued or modified after December 31, 2002. There were no such

-18-

guarantees issued or modified in the first six months of 2003.

In December 2002, FASB issued SFAS No. 148, *Accounting for Stock Based Compensation - Transition and Disclosure - an Amendment of SFAS No. 123*. The Statement amends SFAS No. 123, *Accounting for Stock-Based Compensation*, and provides alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. This Statement also amends the disclosure requirements of SFAS No. 123 to require prominent disclosures in both annual and interim financial statements about the method of stock-based employee compensation and the effect of the method used on reported results. This Statement was effective for fiscal years ending after December 15, 2002. The Company adopted this Statement in regards to disclosure provisions for the year ended December 31, 2002, and has provided the interim information in Note 4, Stock Compensation.

In January 2003, FASB issued Interpretation No. 46, *Consolidation of Variable Interest Entities*, an Interpretation of ARB No. 51 (FIN 46) to clarify when a company should consolidate in its financial statements the assets, liabilities and activities of a variable interest entity. FIN 46 provides general guidance as to the definition of a variable interest entity and requires a variable interest entity to be consolidated if a company absorbs the majority of the variable interest entity's expected losses, or is entitled to receive a majority of the variable interest entity's residual returns, or both. FIN 46 is effective immediately for all new variable interest entities created after January 31, 2003. For variable interest entities created before February 1, 2003, the consolidation provisions of FIN 46 must be applied for the first interim or annual reporting period beginning after June 15, 2003. The disclosure provisions of FIN 46 apply to financial statements issued after January 31, 2003, regardless of when the variable interest entity was established. The adoption of FIN 46 did not have a material impact on the Company's financial reporting and disclosures.

In April 2003, FASB issued SFAS No. 149, *Amendment of Statement 133 on Derivative Instruments and Hedging Activities*. SFAS No. 149 amends and clarifies accounting for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities under SFAS No. 133. In particular, this Statement clarifies under what circumstances a contract with an initial net investment meets the characteristic of a derivative and when a derivative contains a financing component that warrants special reporting in the statement of cash flows. This Statement is generally effective for contracts entered into or modified after June 30, 2003. We are currently analyzing the impact of adoption of SFAS No. 149 on our financial reporting and disclosures.

In May 2003, the FASB issued SFAS No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*. SFAS No. 150 changes the accounting for certain financial instruments that, under previous guidance, could be classified as equity or mezzanine equity, by now requiring those instruments to be classified as liabilities (or assets in some circumstances) in the statement of financial position. Further, SFAS No. 150 requires disclosure regarding the terms of those instruments and settlement alternatives. The guidance in SFAS No. 150 generally is effective for all financial instruments entered into or modified after May 31, 2003, and is otherwise effective at the beginning of the first interim period beginning after June 15, 2003. We have evaluated SFAS No. 150 and determined that it does not have an impact on our financial reporting and disclosures.

7. *Environmental, and Reclamation and Closure Matters*

As of December 31, 2002, we had a reserve balance of \$305.9 million for estimated future costs associated with environmental matters at closed facilities and closed portions of certain operating facilities. During the first six months of 2003, we had a \$2.6 million net decrease in the reserve estimate (\$3.9 million of additions and \$6.5 million of reclassification to asset retirement obligation liability) and \$8.4 million of spending against the reserve. As

-19-

of June 30, 2003, the reserve balance was \$294.9 million.

The sites for which Phelps Dodge has received a notice of potential liability or an information request that currently are considered to be significant are the Pinal Creek site near Miami, Arizona; the Laurel Hill site at Maspeth, New York; the former American Zinc and Chemical site in Langeloth, Pennsylvania; and the Cyprus Tohono site near Casa Grande, Arizona. At June 30, 2003, the cost range for reasonably possible outcomes for all reservable remediation sites was estimated to be from \$266 million to \$520 million of which approximately \$295 million has been reserved.

Phelps Dodge has a number of sites that are not the subject of an environmental reserve because it is not probable that a successful claim will be made against the Company for those sites, but for which there is a reasonably possible likelihood of an environmental remediation liability. As of June 30, 2003, the cost range for reasonably possible outcomes for all such sites was estimated to be from \$4 million to \$37 million. The liabilities arising from potential environmental obligations that have not been reserved at this time may be material to the operating results of a single quarter or year in the future. Management, however, believes the liability arising from potential environmental obligations is not likely to have a material adverse effect on the Company's liquidity or financial position.

On January 1, 2003, we adopted SFAS No. 143 (refer to Note 6, Accounting Standards, for further discussion). The following table summarizes our asset retirement obligation liability as of June 30, 2003:

(Unaudited; \$ in millions)

	2003 Second Quarter	Six Months Ended June 30, 2003
Beginning balance	\$ 152.0	138.6
Liability recorded upon adoption of SFAS No. 143		10.4
New liabilities during the period	0.6	0.6
Accretion expense	3.5	6.9
Payments	(0.4)	(0.8)
Revisions to cash flow estimates	21.3	21.3
Foreign currency translation adjustments	0.1	0.1
Ending balance	<u>\$ 177.1</u>	<u>177.1</u>

During the second quarter 2003, we revised our cash flow estimates (\$21.3 million discounted) for the Chino and Tyrone mines based on an agreement with NMED on the cost estimate for Chino reached in April 2003 and preliminary cost estimate for Tyrone identified in May 2003 by NMED for the financial assurance requirements as part of the closure plans related to the operations at Chino, Cobre and Tyrone (refer to Note 8, Contingencies, for further discussion). The effect of this change in estimate did not have a material impact on our results of operations for the three and six months ended June 30, 2003.

We have estimated the total cost of asset retirement obligations at approximately \$1.1 billion (unescalated, undiscounted and on a third-party cost basis), leaving approximately \$912 million remaining to be accreted over time. These aggregate costs may increase or decrease materially in the future as a result of changes in regulations, technology, mine plans or other factors. Asset retirement obligation activities and expenditures generally are made over a number of years or potentially greater periods commencing near the end of the mine life.

8. *Contingencies*

Significant New Mexico Closure and Reclamation Programs

Mining and smelting operations with leaching, tailing ponds, surface impoundments and other discharging facilities in New Mexico are subject to regulation under the New Mexico Water Quality Act and the Water Quality Control Commission (WQCC) Regulations. The Chino, Cobre and Tyrone mines and the Hidalgo smelter each have obtained multiple discharge permits for their operations, which specify operational, monitoring and notification requirements. These permits are issued for five-year terms and require renewal following the end of each permit term. The WQCC Regulations authorize the New Mexico Environment Department (NMED), which administers the discharge permit program, to require the submission of closure plans showing how applicable discharge permit requirements will be met following closure. Under certain circumstances, NMED also may require submission and approval of abatement plans to address the exceedance of applicable water quality standards.

Further, Chino, Cobre, Tyrone and Hidalgo must submit closure plans for their operations. Hidalgo has an approved closure plan under its discharge permit. The three mines have submitted closure plans, which have been combined with closeout plans under the New Mexico Mining Act (NMMA), as discussed below. The proposed closure plans currently are subject to approval by NMED as part of separate discharge permits for closure for each of the three operations that would supplement the existing discharge permits (hereinafter referred to as "closure permits"). The proposed closure permits contain a number of permit conditions that would modify the proposed closure plans. Chino Mines Company and NMED reached agreement in December 2001 on proposed closure permit conditions presented at a public hearing in February 2002. On January 23, 2003, NMED's hearing officer issued a decision approving the closure permit as proposed by NMED and Chino, with minor changes. NMED issued a permit consistent with the hearing officer's decision on February 24, 2003. An appeal has been filed by a local environmental group. Phelps Dodge Tyrone, Inc. and NMED were unable to reach agreement on permit terms before a public hearing held in May 2002, and presented competing permit proposals. Other parties who participated in the public hearing presented their own proposals. On March 7, 2003, Tyrone received the hearing officer's decision on its permit, which generally adopted NMED's proposal. On April 2, 2003, Tyrone filed an appeal of the hearing officer's decision with the WQCC. NMED issued a permit in accordance with the hearing officer's decision on April 8, 2003, which Tyrone also has appealed. Cobre Mining Company and NMED also have not reached agreement on the terms of a closure permit. The closure permit for Cobre Mining Company does not require a public hearing, and may be issued by NMED at any time.

Chino, Cobre and Tyrone also are subject to permit requirements under NMMA, which was passed in 1993. Following adoption of the New Mexico Mining Act Rules (NMMAR) in 1994, Chino, Cobre and Tyrone received initial permits as existing mining operations under NMMAR in 1997. These permits require revisions to incorporate approved closeout plans, which consist of plans for reclamation of the mining operations to achieve a self-sustaining ecosystem or an approved post-mining land use following cessation of operations at a mine. Existing mining operations may seek a waiver of these reclamation standards for open pits and waste units based upon a demonstration that achieving these standards is technically or economically infeasible or environmentally unsound, as long as measures will be taken to meet air and water quality standards following closure.

NMMAR originally required approval of a closeout plan for an existing mining operation by December 31, 1999, based upon an extension granted by the Director of the Mining and Minerals Division (MMD). NMMAR subsequently was amended to extend the deadline for closeout plan approval until December 31, 2001, and later to October 1, 2002. NMMAR contains a requirement that NMED must provide MMD with a determination that a closeout plan meets applicable environmental standards, including air

and water quality standards, before MMD can approve the closeout plan. NMED's policy is to issue this determination after it has issued closure permits for the facility that submits the closeout plan. In early 2001, Chino, Cobre and Tyrone submitted comprehensive closure/closeout plans (CCPs) to both NMED and MMD intended to address the requirements of both the WQCC Regulations and NMMAR. Approval of the CCPs under NMMAR would require the granting of waivers by MMD as authorized under NMMAR. The CCPs were the subject of the public hearings before NMED for Chino and Tyrone, as discussed above.

As of October 1, 2002, NMED had not issued closure permits for Chino, Cobre or Tyrone. Consequently, as of October 1, 2002, MMD had not approved closeout permits for these three mines. MMD issued Notices of Violation (NOVs) to Chino, Cobre and Tyrone because the three mines did not obtain approved closeout plans by the October 1, 2002, deadline. The NOVs were modified by the Mining Commission following a public hearing to set new deadlines for closeout plan approval tied to NMED permit actions. Based on NMED's permit actions, closeout plan approval for Chino is now due by September 24, 2003, and the closeout plan approval date for Tyrone is April 8, 2004. The closeout plan approval deadline for Cobre will be nine months from the date of NMED's permit issuance, which is currently pending.

NMMAR contains specific requirements regarding financial assurance that must be provided to MMD to assure that sufficient funds would be available to MMD to carry out the closeout plan in the event of a default by the permittee. NMED also may require financial assurance under the WQCC Regulations. The financial assurance requirements are based upon the net present value of estimated costs to carry out the requirements of the closure permit and the approved closeout plan, assuming the state would hire a third-party contractor to conduct the work. Actual reclamation costs may differ significantly from the costs estimated under the permits due to advances in technology and reclamation techniques and opportunities to prepare each site for more efficient reclamation through careful development of the site over time. Consequently, the estimated costs under the permits are higher than the cost the Company would be expected to incur if the Company performed the work.

The CCPs submitted in early 2001 contained cost estimates of approximately \$100 million for Chino, \$121 million for Tyrone, and \$9 million for Cobre, based upon unescalated and undiscounted capital and operating costs over a 30-year operating period. The closure permit negotiated by NMED and Chino Mines Company and approved by the NMED hearing officer has an estimated cost of approximately \$394 million, based upon third-party unescalated and undiscounted capital and operating costs over a 100-year operating period, including the cost of technical studies required under the permit. The Company's two-thirds share of NMED's \$394 million estimate is approximately \$263 million and our joint venture partner's cost share is approximately \$131 million. We estimate total costs for Chino Mines Company to achieve the closure standards required by NMED to be approximately \$264 million (100 percent basis); that estimate is approximately one-third lower than the financial assurance cost estimate as a result of the Company's historical cost advantages, savings from the use of the Company's own personnel and equipment versus third-party contract costs, and opportunities to prepare the site for more efficient reclamation. The financial assurance cost estimate includes approximately \$10 million (100 percent basis) of costs the Company has recognized in environmental reserves. The Company's two-thirds share of these costs is approximately \$176 million and our joint venture partner's cost share is approximately \$88 million. At June 30, 2003, and December 31, 2002, we had accrued approximately \$18 million and \$8 million, respectively, (two-thirds basis) for reclamation at Chino. The NMED cost estimate for Chino is subject to further review, and possible adjustment, by MMD under NMMAR.

NMED estimated the cost to carry out the requirements of its proposed closure permits for Tyrone at approximately \$440 million, without discounting or escalation, under NMED's proposal at the May 2002 hearing; Tyrone estimated the cost of its

-22-

proposal at approximately \$328 million, without discounting or escalation over a 100-year operating period. NMED has not yet supplied its proposed cost estimate for Cobre. The proposed terms of the closure permits would require additional studies over the five-year term of the permits to refine the closure plan. The plan requirements and cost estimates may increase or decrease based upon the results of the studies and other factors, including changes in technology, completion of some closure and reclamation work, and inflation.

Based upon NMED's undiscounted financial assurance cost estimates for the Tyrone plan of approximately \$440 million, and considering the same cost advantages as indicated in the above discussion regarding Chino, we estimate the Company's costs to achieve the closure standards under that estimate to be approximately \$288 million for Tyrone. The Company has not obtained approval from NMED of an estimate of its cost to achieve the closure standards that would be required by the hearing officer's decision. The Company's current cost estimate for Cobre of approximately \$9 million will be updated with the issuance of the discharge permit. At June 30, 2003, and December 31, 2002, we had accrued closure costs of approximately \$60 million and \$27 million, respectively, at Tyrone and approximately \$6 million and \$2 million, respectively, at Cobre.

Following NMED's issuance of the closure permits, Chino, Cobre and Tyrone are required to submit proposals for financial assurance based upon the permit requirements and subject to NMED's approval. Under the proposed closure permit terms, the amount of financial assurance may be based upon the net present value (NPV) of the estimated cost for a third-party to implement the plan, using discount and escalation rates specified in the permit. These amounts are expected to be substantially lower than the undiscounted and unescalated cost estimates. For example, based upon the cost estimate approved by NMED, the financial assurance amount for Chino could be approximately \$191 million. This amount is based on annual escalation rates of approximately 3.2 percent for long-term water treatment costs and approximately 3.6 percent for other costs and discount rates of 5 percent for years one through 12 of the plan and 8 percent for years 13 through 100.

NMMAR requires that financial assurance for a closeout plan be approved and put in place before MMD can approve the closeout plan. Chino and Tyrone have provided approximately \$56 million and \$58 million of financial assurance in the form of surety bonds, respectively, to NMED under the terms of several discharge permits. The closure and financial assurance requirements of these permits have been superseded by the recently issued NMED closure permits. Consequently, the Company has advised NMED that this financial assurance should be terminated and replaced by new financial assurance under the terms of the new closure permits. Chino and Tyrone have submitted financial assurance proposals in accordance with the schedules under their NMED closure permit proposing financial assurance primarily in the form of corporate performance guarantees from the Company. Cobre also has approximately \$2 million of financial assurance in place held jointly by NMED and MMD. Following NMED's issuance of the closure permits, and prior to MMD's approval of the closeout plans, Chino, Tyrone and Cobre will be required to provide substantial amounts of additional financial assurance to cover the amounts of the approved cost estimates. Hidalgo currently has provided financial assurance in the amount of approximately \$11 million under its discharge permit.

In late May 2003, the Company and the state announced an agreement on a framework for the Company to provide financial assurance for Chino, Tyrone and Cobre under both NMMAR and WQCC regulations. Under this agreement, the Company will provide financial assurance based upon the NPV of the cost estimates in a total amount of approximately \$484 million. Initially, approximately 70 percent of this amount will be covered by a corporate performance guarantee. At least \$50 million will be provided in the form of trust funds, increasing to at least \$75 million after five years. The balance will be provided as collateral, including liens on certain owned parcels of non-mining real estate located in New Mexico. In addition,

the Company will expend at least \$30 million on accelerated closure and reclamation work over the next 10 years. The amount of the guarantee will be reduced to approximately 64 percent by the amount of accelerated reclamation performed. Finalization of the financial assurance is subject to completion of the permitting process, including additional public comment and hearings. MMD also has proposed some changes to NMMAR for consideration by the Mining Commission, which could affect the final financial assurance package.

9. Earnings (Loss) Per Share

Basic earnings (loss) per share is computed by dividing net income (loss) available to common shares by the weighted average number of common shares outstanding for the period. Diluted earnings (loss) per common share is computed in a similar manner except that the denominator is increased to include the incremental number of common shares that would have been outstanding assuming the conversion of mandatory convertible preferred shares, the exercise of stock options where the exercise prices were less than the average market price of the Company's common shares during the period, and the number of unvested restricted shares, but all of the foregoing only to the extent that the related impacts are not anti-dilutive. Additionally, dividends on mandatory convertible preferred shares that were deducted in arriving at net income (loss) available to common shares are added back to the numerator as a result of the assumed conversion of such preferred shares.

As a result of the net loss experienced for the quarter and six-months ended June 30, 2003, the number of incremental common shares relating to the assumed conversion of the mandatory convertible preferred shares (5.0 million) and unvested restricted stock (0.5 million) were excluded from the calculation as the related impacts were anti-dilutive.

As a result of the net loss experienced for the quarter and six-months ended June 30, 2002, the number of incremental common shares relating to the assumed conversion of the mandatory convertible preferred shares (1.1 million and 0.5 million, respectively), unvested restricted stock (0.2 million) and stock options (0.1 million) issued to employees were excluded from the calculation as the related impacts were anti-dilutive.

Finally, common shares relating to stock options where the exercise prices exceeded the average market price of the Company's common shares during the period were also excluded from the diluted earnings per share calculation as the related impact was anti-dilutive. Incremental shares relating to these options totaled 7.2 million shares at an average exercise price of \$58.66 for the 2003 second quarter and 8.6 million at an average exercise price of \$55.30 for the six months ended June 30, 2003; and 7.4 million shares at an average exercise price of \$61.66 and \$61.65 for the quarter and six months ended June 30, 2002.

* Refer to Note 2, Restatements, for further discussion.

** Excludes mandatory convertible preferred shares, unvested restricted stock and stock options due to the anti-dilutive impact.

10. *Benefit (Provision) for Taxes on Income*

The Company's income tax provision for the 2003 second quarter principally resulted from (i) taxes on earnings at international operations (\$12.2 million) that cannot be offset by losses at domestic operations and (ii) a benefit from finalizing year-end 2002 estimates in the Company's 2002 U.S. tax return filed in June 2003 (\$4.2 million). The Company's income tax provision for the six months ended June 30, 2003, primarily comprised the following: (i) taxes on earnings at international operations (\$26.3 million) that cannot be offset by losses at domestic operations and (ii) a benefit from finalizing year-end 2002 estimates in the Company's 2002 U.S. tax return filed in June 2003 (\$4.2 million).

The Company's income tax provision for the 2002 second quarter, primarily comprised the following: (i) a \$21.9 million benefit recognized for the second quarter 2002 net operating losses that, based on the March enactment of the Job Creation and Worker Assistance Act of 2002, may be carried back to recover prior years' taxes paid; (ii) a \$13.0 million benefit for release of deferred taxes previously provided with regard to Plateau Mining Corporation; and (iii) a \$4.1 million expense for taxes on earnings at international operations. The Company's income tax benefit for the six months ended June 30, 2002, principally comprised the following items: (i) a \$38.5 million tax benefit associated with the carryback of 2001 net operating losses that, based on the new tax legislation, may also be carried back to recover prior years' taxes paid; (ii) a \$34.8 million benefit recognized for the first half of 2002 net operating losses, based on the new tax legislation; (iii) a \$15.8 million expense for taxes on earnings at international operations; and (iv) a \$13.0 million benefit for release of deferred taxes previously provided.

11. *Accounting for Derivative Instruments and Hedging Activities*

Edgar Filing: PHELPS DODGE CORP - Form 10-Q

The Company does not purchase, hold or sell derivative contracts unless we have an existing asset, obligation or anticipate a future activity that is likely to occur and will expose us to market risk. We do not enter into any contracts for speculative purposes. We use various strategies to manage our market risk, including the use of derivative contracts to limit, offset or reduce our market exposure. Derivative instruments are used to manage well-defined commodity price, energy, foreign exchange and interest rate risks from our primary business activities. The fair values of our derivative instruments are based on quoted market prices for similar instruments at period end. Refer to Management's Discussion and Analysis and Note 20, Derivative Financial Instruments Held for Purposes Other Than Trading and Fair Value of Financial Instruments, to the Consolidated Financial Statements included in the Company's Form 10-K for the year ended December 31, 2002, for a discussion on our derivative instruments.

During the quarter and six months ended June 30, 2003, we reclassified approximately \$2.8 million and \$4.0 million, respectively, of other comprehensive losses to the statement of consolidated opera-

-25-

tions, principally as a result of our floating-to-fixed interest rate swaps.

During the quarter and six month periods ended June 30, 2002, we reclassified approximately \$3.2 million and \$6.8 million, respectively, of other comprehensive losses to the statement of operations, principally as a result of our floating-to-fixed interest rate swaps.

12. *Shareholders Equity*

Series A Mandatory Convertible Preferred Stock

Each share of Series A Mandatory Convertible Preferred Stock (Series A Stock) is convertible into 2.083 shares of Common Stock, subject to certain adjustments, at any time prior to August 15, 2005, and is entitled to an annual dividend of \$6.75, paid quarterly. On August 15, 2005, each share of Series A Stock will automatically convert, subject to certain adjustments, into between 2.083 and 2.5 shares of Common Stock depending on the then-current market price of our Common Stock. Each share of Series A Stock is non-voting and entitled to a liquidation preference of \$100 plus any accrued but unpaid dividends. There were 6 million authorized shares and 2 million outstanding shares of Series A Stock at June 30, 2003.

REVIEW BY INDEPENDENT ACCOUNTANTS

The financial information as of June 30, 2003, and for the three-month and six-month periods ended June 30, 2003 and 2002, included in Part I pursuant to Rule 10-01 of Regulation S-X has been reviewed by PricewaterhouseCoopers LLP (PricewaterhouseCoopers), the Company's independent accountants, in accordance with standards established by the American Institute of Certified Public Accountants. PricewaterhouseCoopers' report is included in this quarterly report.

PricewaterhouseCoopers does not carry out any significant or additional procedures beyond those that would have been necessary if its report had not been included in this quarterly report. Accordingly, such report is not a report or part of a registration statement within the meaning of Sections 7 and 11 of the Securities Act of 1933 and the liability provisions of Section 11 of such Act do not apply.

-26-

Report of Independent Accountants

To the Board of Directors and Shareholders
of Phelps Dodge Corporation

We have reviewed the accompanying consolidated balance sheet of Phelps Dodge Corporation and its subsidiaries as of June 30, 2003, and the related statement of consolidated operations for each of the three-month and six-month periods ended June 30, 2003 and 2002, the consolidated statement of cash flows for the six-month periods ended June 30, 2003 and 2002, and the consolidated statement of shareholders' equity for the six-month period ended June 30, 2003. This interim financial information is the responsibility of the Company's management.

We conducted our review in accordance with standards established by the American Institute of Certified Public Accountants. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the United States of America, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying consolidated interim financial information for it to be in conformity with accounting principles generally accepted in the United States of America.

As described in Note 2 to the consolidated interim financial information, the Company restated its consolidated interim financial information for the three-month and six-month periods ended June 30, 2002.

We previously audited in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet as of December 31, 2002, and the related consolidated statements of operations, of cash flows and of shareholders' equity for the year then ended (not presented herein), and in our report dated April 3, 2003 we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet information as of December 31, 2002, is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

Item 2. Management's Discussion and Analysis

The United States securities laws provide a "safe harbor" for certain forward-looking statements. This quarterly report contains forward-looking statements that express expectations of future events or results. All statements based on future expectations rather than historical facts are forward-looking statements that involve a number of risks and uncertainties, and Phelps Dodge Corporation (the Company, which may be referred to as Phelps Dodge, PD, we, us or ours) cannot give assurance that such statements will prove to be correct. Our business consists of two divisions, Phelps Dodge Mining Company (PDMC) and Phelps Dodge Industries (PDI). Refer to Management's Discussion and Analysis in the Company's report on Form 10-K for the year ended December 31, 2002, for a further discussion of such risks and uncertainties, our operations, and our critical accounting policies. Additionally, refer to Note 6, Accounting Standards, to our unaudited June 30, 2003, Consolidated Financial Information for a discussion on the adoption of Statement of Financial Accounting (SFAS) No. 143.

Restatements

As discussed in Note 2, Restatements, in this Form 10-Q for the quarter ended June 30, 2003, certain accounting matters were identified in the fourth quarter of 2002 that required restatement of our December 31, 2001 and 2000, Consolidated Financial Statements and our financial statements for the quarterly periods ended March 31, 2001, through September 30, 2002. The adjustments for the quarter and six months ended June 30, 2002, decreased operating loss by \$5.6 million and \$11.3 million, respectively, and decreased net loss by \$2.1 million, or 2 cents per common share, and \$5.0 million, or 7 cents per common share, respectively.

Additionally, our presentation of reportable segment information for PDMC for the quarter and six months ended June 30, 2002, has been revised to reflect additional segments.

RESULTS OF OPERATIONS

Consolidated Financial Results

(Unaudited; \$ in millions except per share amounts)

	Second Quarter	
	2003	2002
		(As Restated)
Sales and other operating revenues	\$962.2	966.8
Operating income (loss)	\$ 17.2	(10.2)
Loss before cumulative effect of accounting change	\$ (15.2)	(34.3)
Cumulative effect of accounting change	—	—
Net loss	\$ (15.2)	(34.3)
Net loss per common share, basic and diluted	\$ (0.21)	(0.46)

The Company had a consolidated net loss in the 2003 second quarter of \$15.2 million, or 21 cents per common share, including a special, net gain of \$4.5 million, or 5 cents per common share, after taxes. In the 2002 second quarter, the consolidated net loss was \$34.3 million, or 46 cents per common share, including a special, net loss of \$12.7 million, or 16 cents per common share, after taxes.

The \$19.1 million decrease in consolidated loss in the 2003 second quarter compared with the corresponding 2002 period primarily was due to higher copper prices (approximately \$8 million), lower interest expense (\$12.2 million) and a favorable change in special items and provisions (\$35.3 million); partially offset by a higher tax provision (\$34.0 million) resulting primarily from the absence of the effect of 2002 tax legislation that permitted a five-year carryback of our 2001 and 2002 net operating losses.

-28-

(Unaudited; \$ in millions except per share amounts)

	Six Months Ended June 30,	
	2003	2002
		(As Restated)
Sales and other operating revenues	\$ 1,940.2	1,885.3
Operating income	\$ 45.9	2.5
Loss before cumulative effect of accounting change	\$ (38.6)	(36.2)
Cumulative effect of accounting change	8.4	(22.9)
Net loss	\$ (30.2)	(59.1)
Loss before cumulative effect of accounting change per common share, basic and diluted	\$ (0.51)	(0.48)
Cumulative effect of accounting change	0.09	(0.29)
Net loss per common share, basic and diluted	\$ (0.42)	(0.77)

The Company had a consolidated loss for the six months ended June 30, 2003, of \$30.2 million, or 42 cents per common share, including a special, net gain of \$14.0 million, or 16 cents per common share, after taxes. For the six months ended June 30, 2002, the consolidated loss was \$59.1 million, or 77 cents per common share, including a special, net gain of \$3.5 million, or 4 cents per common share, after taxes.

The \$28.9 million decrease in consolidated loss for the six months ended June 30, 2003 compared with the corresponding 2002 period primarily was due to a higher cumulative income effect of accounting changes (\$31.3 million) mostly due to the goodwill impairment losses upon adoption of SFAS No. 142 in 2002, higher LME copper prices (approximately \$33 million), favorable change in special items and provisions (\$33.9 million) and lower interest expense primarily resulting from extinguishment of debt in the third quarter of 2002 (\$29 million); partially offset by a higher tax provision (\$86.4 million) resulting primarily from the absence of the effect of 2002 tax legislation that permitted a five-year carryback of the 2001 and 2002 net operating losses.

Special Items

Throughout Management's Discussion and Analysis there is disclosure and discussion of what management believes to be special items. We view special items as unpredictable and atypical of our operations in the period. We believe consistent identification, disclosure and discussion of such items, both favorable and unfavorable, provide additional information to assess the quality of our performance and our earnings or losses. In addition, management measures the performance of its reportable segments excluding special items. This supplemental information is not a substitute for any U.S. generally accepted accounting principles (GAAP) measure and should be evaluated within the context of our U.S. GAAP results. Any supplemental information references to earnings, losses or results excluding special items or before special items, our non-GAAP measure of items, may not be comparable to similarly titled measures reported by other companies.

Quest for Zero Operational Improvement Program

Phelps Dodge announced in October 2001 that it was commencing *Quest for Zero* (QFZ), a comprehensive, lean-production program, designed to, among other things, improve operating income by a targeted \$250 million annually. *Quest for Zero* encompasses both the October 2001 program and the \$150 million cost improvement program announced in May 2001. The Company's goal is to achieve these combined annual operating income improvements of \$400 million by the end of 2003 when compared with the results that were then expected for 2001.

In order to achieve the full \$400 million target, PDMC chartered business improvement teams to drive performance improvement projects and best practices. The elimination of variance and waste are key factors in this process, coupled with the rapid transfer of best practices to all business units. On a quarterly basis, we document improvement successes, failures and potential projects yet to be implemented. New project ideas are generated at internal conferences where statistical analysis tools are utilized on current performance data to identify improvement opportunities. Improvement projects are prioritized and implemented accordingly. Key elements of the plan going forward include six-sigma quality programs, technology innovations, global procurement strategies and improved operating practices.

During the 2003 second quarter, we achieved \$76 million (an annual run rate slightly in excess of \$300 million) in improvements, bringing total improvements in the eight quarters since the program was announced to \$421 million.

We remain determined to drive toward our stretch goal of an implied production cost of 60 cents per pound. We have experienced a leveling off of the rate of improvement due to the increased challenge that comes with multi-year improvement projects as we begin to tackle more difficult initiatives; unforeseen costs including higher energy, pension and medical costs, and higher administrative costs and professional fees; and our Company's decision to emphasize growth-oriented projects. We expect to achieve fourth quarter 2003 *QFZ* improvements of \$90 million to \$100 million, equating to an annualized run-rate of \$360 million to \$400 million.

The following is a summary of improvement dollars:

* U.S. Mining Operations combines the following segments: Morenci, Bagdad/Sierrita, Miami/Bisbee, Chino/Cobre, Tyrone, Manufacturing and Sales, and Other Mining.

** South American Mines combines the following segments: Candelaria, Cerro Verde and El Abra.
Business Divisions

Results for 2003 and 2002 can be meaningfully compared by separate reference to our reporting divisions, PDMC and PDI. PDMC is a business division that includes our worldwide copper operations from mining through rod production, marketing and sales; molybdenum operations from mining through manufacturing, marketing and sales; other mining operations and investments; and worldwide mineral exploration and development programs. PDMC comprises 11 reportable segments. PDI, our manufacturing division, produces engineered products principally for

the global energy, telecommunications, transportation and specialty chemical sectors. PDI includes our Specialty Chemicals segment and our Wire and Cable segment. Significant events and transactions have occurred within each segment which, as indicated in the separate discussions presented below, are material to an understanding of the particular year's results and to a comparison with results of the other periods.

RESULTS OF PHELPS DODGE MINING COMPANY

PDMC is our international business division that comprises our vertically integrated copper operations from mining through rod production, primary molybdenum operations through conversion, marketing and sales, and worldwide exploration. PDMC comprises 11 reportable segments.

Our copper mines comprise five reportable segments in the United States (Morenci, Bagdad/Sierrita, Miami/Bisbee, Chino/Cobre and Tyrone) and three reportable segments in South America (Candelaria, Cerro Verde and El Abra). These segments include open-pit mining, sulfide ore concentrating and electrowinning. In addition, some of these produce gold and silver, and the Bagdad and Sierrita mines also produce molybdenum and rhenium as by-products.

The Manufacturing and Sales segment consists of conversion facilities including our smelters, refineries and rod mills, as well as sales and marketing. The Manufacturing and Sales segment sells copper to others primarily as rod, cathode or concentrate, and as rod to our Wire and Cable segment. In addition, at times it smelts and refines copper and produces copper rod for customers on a toll basis. Toll arrangements require the tolling customer to deliver appropriate copper-bearing material to our facilities, which we then process into a product that is returned to the customer. The customer pays PDMC for processing its material into the specified products.

The Primary Molybdenum segment consists of the Henderson and Climax mines and related conversion facilities. This segment is an integrated producer of molybdenum, with mining, roasting and processing facilities producing high-purity, molybdenum-based chemical and metallurgical products. In addition, at times it roasts and/or processes material on a toll basis. Toll arrangements require the tolling customer to deliver appropriate molybdenum-bearing material to our facilities, which we then process into a product that is returned to the customer. The customer pays PDMC for processing its material into the specified products.

Other Mining includes our worldwide mineral exploration and development programs, a process technology center that directs its activities at improving existing processes and developing new cost-competitive technologies, and other ancillary operations.

- (A) Minority participant interests include (i) a 15 percent undivided interest in Morenci, Arizona, copper mining complex held by Sumitomo Metal Mining Arizona, Inc., (ii) a one-third partnership interest in Chino Mines Company in New Mexico held by Heisei Minerals Corporation, (iii) a 20 percent partnership interest in Candelaria in Chile held by SMMA Candelaria, Inc., a jointly owned indirect subsidiary of Sumitomo Metal Mining Co., Ltd., and Sumitomo Corporation, and (iv) a 49 percent partnership interest in the El Abra copper mining operation in Chile held by Corporación Nacional del Cobre de Chile (CODELCO).

Note: Supplemental Data

Implied unit cost of copper production measures the all-in cost of each pound of copper produced by PDMC. As the title indicates, this measure is the cost implied by the market price of copper (i.e., London Metal Exchange average spot) for a given period versus PDMC's operating income (loss) for the same period.

There is no established common standard for calculating unit production costs in the copper industry. PDMC's implied unit production costs indicator (which is based on readily accessible, publicly disclosed data) acts as a proxy to enable investors to follow and interpret cost trends over historical periods.

Edgar Filing: PHELPS DODGE CORP - Form 10-Q

PDMC calculates its all-in operating margin per pound of copper sold by dividing its operating income (loss) excluding special items by the total pounds of copper sold from its own mines for its own account (as disclosed in the table above). This results in an all-in operating margin (i.e., inclusive of cost of products sold; depreciation, depletion and amortization; selling and general administrative expense; and exploration and research expense for the segment's operations) that is compared to the market price of copper to render an implied cost of copper production. Following is the calculation of implied unit cost of copper production for the quarters and six months ended June 30, 2003 and 2002:

(Unaudited; \$ in millions except per pound amounts)

	Second Quarter	
	2003	2002
		(As Restated)
PDMC implied unit cost of copper production		
Operating income	\$ 25.8	38.2
Less special operating items	(0.5)	20.9
	\$ 26.3	17.3
Copper sales from own mines million pounds	533.0	529.4
Operating margin per pound of copper sold	\$0.049	0.032
LME average spot copper price per pound cathodes	\$0.744	0.730

Note: Our measure of implied unit cost of copper production may not be comparable to similarly titled measures reported by other companies.

Total PDMC Division Sales

PDMC's sales and other operating revenues to unaffiliated customers decreased \$2.9 million in the 2003 second quarter compared with the 2002 second quarter. The decrease reflected lower sales volumes (approximately \$52 million) associated with lower market demand; partially offset by higher average copper prices (approximately \$19 million), higher average molybdenum prices (approximately \$24 million) and higher sales volumes of molybdenum (approximately \$6 million).

PDMC's sales and other operating revenues to unaffiliated customers increased \$40.4 million, or 3 percent, in the first six months of 2003 compared with the first six months of 2002. The increase reflected higher average copper prices (approximately \$48 million), higher average molybdenum prices (approximately \$39 million) and higher sales volumes of molybdenum (approximately \$6 million); partially offset by lower copper sales volumes (approximately \$58 million) associated with lower market demand.

Total PDMC Operating Income (Loss)

PDMC reported operating income of \$25.8 million in the 2003 second quarter, including a special, net pre-tax loss of \$0.5 million, compared with operating income of \$38.2 million in the 2002 second quarter, including a special, net pre-tax gain of \$20.9 million. The decrease in operating income primarily reflected lower pre-tax special gains (\$21.4 million), partially offset by higher copper prices (approximately \$8 million).

PDMC reported operating income of \$61.5 million in the first six months of 2003, including a special, net pre-tax loss of \$0.5 million, compared with operating income of \$65.5 million in the first six months of 2002, including a special, net pre-tax gain of \$34.7 million. The decrease in operating income primarily reflected lower pre-tax special gains (\$35.2 million), partially offset by higher copper prices (approximately \$33 million).

The New York Commodity Exchange (COMEX) spot price per pound of copper cathode, primarily upon which we base our U.S. sales, averaged 74.7 cents and 74.1 cents in the second quarters of 2003 and 2002, respectively, and 75.4 cents and 73.2 cents for the first six months

Edgar Filing: PHELPS DODGE CORP - Form 10-Q

of 2003 and 2002, respectively. The London Metal Exchange (LME) spot price per pound of copper cathode, primarily upon which we base our international sales, averaged 74.4 cents and 73.0 cents in the second quarters of 2003 and 2002, respectively, and 74.9 cents and 71.8 cents for the first six months of 2003 and 2002, respectively.

The implied full and cash unit cost of copper production for the second quarter of 2003 was comparable to the second quarter of 2002. Favorable *Quest for Zero* operating income improvements and molybdenum prices reduced implied unit production costs by approximately 4 and 3.5 cents per pound, respectively. These improvements were primarily offset by unfavorable stockpile and inventory changes (approximately 2.5 cents per pound), unfavorable mine haulage profiles and ore grades (approximately 2.5 cents per pound), higher energy costs (approximately 1.5 cents per pound), and higher salary and benefit costs (approximately 1 cent per pound).

The implied full unit cost of copper production for the first six months of 2003 was comparable to the corresponding 2002 period. The cash unit cost of copper production for the first six months of 2003 increased approximately 1 cent per pound compared with the six months ended June 30, 2002. Favorable *Quest for Zero* operating income improvements and molybdenum prices reduced implied unit production costs by approximately 4.5 and 2.5 cents per pound, respectively. These improvements were primarily offset by higher energy costs (approximately 1.5 cents per pound), unfavorable stockpile and inventory changes (approximately 1.5 cents per pound),

unfavorable mine haulage profiles and ore grades (approximately 1.5 cents per pound), and higher salary and benefit costs (approximately 1 cent per pound).

Note: Supplemental Data

PDMC Results by Reportable Segments

The following tables summarize, on a segment basis, the production and sales statistics and the operating income (loss) and special items and provisions for the second quarter and first six months of 2003 and 2002. Our presentation of reportable segment information for PDMC for the quarter and six months ended June 30, 2002, has been revised to reflect additional segments.

- 41 -

Sales of Copper (U.S. and South America) and Molybdenum

The Manufacturing and Sales segment is responsible for selling all copper produced at the U.S. mines. Intersegment revenues of the individual U.S. mines represent an internal allocation based on PDMC's sales to unaffiliated customers. Therefore, the following discussion and analysis combines the U.S. Mines and Other Mining segments with the Manufacturing and Sales segment. Additionally, the South American Mines sold approximately 36 percent of their copper to the Manufacturing and Sales segment in each of the second quarters of 2003 and 2002. Intersegment sales by the South American Mines are based upon arms-length prices at the time of the sale. Intersegment sales of any individual mine may not be reflective of the actual prices PDMC ultimately receives due to a variety of factors including additional processing, timing of sales to unaffiliated customers, and transportation premiums. These sales are reflected in the Manufacturing and Sales segment.

* U.S. Mining Operations combines the following segments: Morenci, Bagdad/Sierrita, Miami/Bisbee, Chino/Cobre, Tyrone, Manufacturing and Sales, and Other Mining.

** South American Mines combines the following segments: Candelaria, Cerro Verde and El Abra.
U.S. Mines, Other Mining and Manufacturing and Sales Segments Sales

Sales and other operating revenues to unaffiliated customers by U.S. Mines, Other Mining and Manufacturing and Sales decreased \$36.3 million, or 7 percent, in the 2003 second quarter compared with the 2002 second quarter. This decrease primarily was due to lower copper sales volumes (approximately \$42 million) and lower precious metals sales (approximately \$3 million); partially offset by higher average copper prices (approximately \$8 million).

Sales and other operating revenues to unaffiliated customers by U.S. Mines, Other Mining and Manufacturing and Sales decreased \$14.1 million, or 2 percent, in the first six months of 2003 compared with the corresponding 2002 period. This decrease primarily was due to lower copper sales volumes (approximately \$52 million) and lower precious metals sales (approximately \$3 million); partially offset by higher average copper prices (approximately \$37 million).

South American Mines Segments Sales

South American Mines sales and other operating revenues to unaffiliated customers increased \$3.0 million, or 3 percent, in the 2003 second quarter compared with the 2002 second quarter. This increase primarily was due to higher realized copper prices (approximately \$10 million) and higher precious metals sales (approximately \$3 million); partially offset by lower sales volumes of copper (approximately \$10 million).

South American Mines sales and other operating revenues to unaffiliated customers increased \$9.5 million, or 5 percent, in the first six months of 2003 compared with the corresponding 2002 period. This increase primarily was due to higher realized copper prices (approximately \$13 million) and higher precious metals sales (approximately \$3 million); partially offset by lower sales volumes of copper (approximately \$7 million).

Primary Molybdenum Segment Sales

Primary Molybdenum sales and other operating revenues to unaffiliated customers increased \$30.4 million, or 48 percent, in the 2003 second quarter compared with the 2002 second quarter. This increase primarily was due to higher average molybdenum prices (approximately \$24 million) and higher sales volumes of molybdenum (approximately \$6 million).

Primary Molybdenum sales and other operating revenues to unaffiliated customers increased \$45.0 million, or 36 percent, in the first six months of 2003 compared with the corresponding 2002 period. This increase primarily was due to higher average molybdenum prices (approximately \$39 million) and higher sales volumes of molybdenum (approximately \$6 million).

Operating Income (Loss) for Copper (U.S. and South America) and Molybdenum

In addition to the allocation of revenues, management allocates certain operating costs, expenses and capital of PDMC's segments that may not be necessarily reflective of market conditions. We also do not allocate all costs and expenses applicable to a mine or operation from the division or corporate offices. Accordingly, the segment information reflects management's determinations that may not be indicative of actual financial performance of each segment as if it was an independent entity.

* U.S. Mining Operations combines the following segments: Morenci, Bagdad/Sierrita, Miami/Bisbee, Chino/Cobre, Tyrone, Manufacturing and Sales, and Other Mining.

** South American Mines combines the following segments: Candelaria, Cerro Verde and El Abra.

U.S. Mining Operations Operating Income (Loss)

U.S. Mining Operations reported an operating loss of \$2.0 million in the 2003 second quarter, compared with operating income of \$17.5 million in the 2002 second quarter including \$20.9 million of special, net pre-tax gains.

U.S. Mining Operations reported an operating loss of \$2.6 million for the first six months of

2003, compared with operating income of \$17.6 million in the corresponding 2002 period including \$34.7 million of special, net pre-tax gains. (Refer to the separate discussion of PDMC's segments below for further detail.)

Note: Supplemental Data

The following table summarizes U.S. Mining Operations special items for 2003 and 2002 and the resultant losses excluding these special items:

(Unaudited; \$ in millions)

	Second Quarter	
	2003	2002
		(As Restated)
Special, pre-tax items	\$(0.5)	20.9
Segment operating losses excluding special items	\$(1.5)	(3.4)

(Unaudited; \$ in millions)

	Six Months Ended June 30,	
	2003	2002
		(As Restated)
Special, pre-tax items	\$(0.5)	34.7
Segment operating losses excluding special items	\$(2.1)	(17.1)

Note: Our non-GAAP measure of special items may not be comparable to similarly titled measures reported by other companies.

Morenci Segment Operating Income

The Morenci open-pit mine, located in southeastern Arizona, primarily produces electrowon copper cathode. We own an 85 percent interest in Morenci and apply the proportional consolidation method of accounting. Operating income of \$4.9 million in the 2003 second quarter decreased \$8.0 million compared with the 2002 second quarter, primarily due to higher cost of copper production (approximately \$8 million) primarily due to higher energy costs.

Operating income of \$17.3 million for the first six months of 2003 decreased \$7.4 million compared with the corresponding 2002 period, primarily due to higher cost of copper production (approximately \$13 million) primarily due to higher energy costs; partially offset by higher average copper prices (approximately \$4 million).

Bagdad/Sierrita Segment Operating Income

Our wholly owned Bagdad and Sierrita open-pit mines, located in northwest Arizona and near Green Valley, Arizona, respectively, mine copper sulfide and oxide ores. They produce copper and molybdenum concentrates. Since January 2002, the Bagdad and Sierrita mines have been producing between 50 and 70 percent of their capacity due to the economic environment. The 2003 second quarter operating income of \$18.3 million increased \$13.8 million compared with the 2002 second quarter, primarily due to lower cost of copper production (approximately \$13 million) and higher copper sales volumes (approximately \$1 million). The lower cost of copper production of \$13 million was primarily due to higher molybdenum credits resulting from higher molybdenum prices and volumes (approximately \$19 million); partially offset by an unfavorable change in heap leach and work-in-process inventory (\$1 million), and higher electricity costs (approximately \$3 million).

Edgar Filing: PHELPS DODGE CORP - Form 10-Q

Operating income of \$25.0 million for the first six months of 2003 increased \$24.8 million compared with the corresponding 2002 period, primarily due to lower cost of copper production (approximately \$25 million) and higher average copper prices (approximately \$2 million). The lower cost of copper production of \$25 million was primarily due to higher molybdenum credits resulting from higher molybdenum prices and volumes (approximately \$28 million), partially offset by higher electricity costs (approximately \$4 million).

On April 28, 2003, the Company announced its copper concentrate-leaching demonstration plant at Bagdad, Arizona, had been commissioned ahead of schedule. It is now operating at design capacity. The Bagdad plant is the first commercial facility in the world to use pressure leaching to treat chalcopyrite concentrates. The new technology should make it more economical to recover copper from chalcopyrite ores, which accounts for approximately 70 percent of the world's known copper reserves. Our immediate plans are to continue in the present mode of operation until the economic viability of the process is proven. Once we have completed this demonstration, we will be ready for larger scale commercial application where appropriate.

- 44 -

Miami/Bisbee Segment Operating Loss

Our wholly owned Miami open-pit mine, located in Miami, Arizona, produces electrowon copper cathode. Since January 2002, the Miami mine and refinery were closed temporarily due to the economic environment. The Bisbee precipitation operation is located in southern Arizona. The 2003 second quarter operating loss of \$3.1 million decreased \$0.7 million compared with the 2002 second quarter, primarily due to lower cost of copper production (approximately \$1 million) resulting from higher production and lower depreciation expense (approximately \$1 million).

The operating loss of \$3.8 million for the first six months of 2003 decreased \$4.5 million compared with the corresponding 2002 period, primarily due to lower cost of copper production (approximately \$6 million) resulting from higher production (approximately \$4 million) and lower depreciation expense (approximately \$2 million).

Chino/Cobre Segment Operating Income (Loss)

The Chino open-pit mine, located near Silver City, New Mexico, primarily mines copper sulfide and oxide ores. We own a two-thirds partnership interest in Chino and apply the proportional consolidation method of accounting. Since January 1, 2002, the Chino mine and smelter were closed temporarily; however, residual leaching has continued. Our wholly owned Cobre mine, which is adjacent to the Chino mine, has been on care-and-maintenance status since late 1998. The 2003 second quarter operating loss of \$2.8 million increased \$4.1 million compared with the 2002 second quarter, primarily due to lower copper sales volumes (approximately \$1 million), higher cost of copper production (approximately \$3 million) due to lower production from lower leach solution grades and flow rates (approximately \$2 million) and higher electricity costs (approximately \$1 million).

The operating loss of \$4.9 million for the first six months of 2003 increased \$11.9 million compared with the corresponding 2002 period, primarily due to lower copper sales volumes (approximately \$4 million), higher cost of copper production (approximately \$7 million) due to lower production from lower leach solution grades and flow rates (approximately \$6 million) and higher electricity costs (approximately \$3 million); partially offset by lower closure expense (approximately \$1 million) and lower operating costs (approximately \$1 million).

Tyrone Segment Operating Income (Loss)

Our wholly owned Tyrone open-pit mine, located near Tyrone, New Mexico, primarily mines copper oxide ore. It produces electrowon copper cathode. The 2003 second quarter operating loss of \$4.5 million increased \$5.1 million compared with the 2002 second quarter, due to higher cost of copper production (approximately \$5 million). The higher cost of copper production included an unfavorable change in heap leach and work-in-process inventory (approximately \$8 million) and higher depreciation (approximately \$1 million); partially offset by lower closure expense from the adoption of SFAS No. 143 (approximately \$3 million).

The operating loss of \$8.9 million for the first six months of 2003 increased \$7.8 million compared with the corresponding 2002 period, due to higher cost of copper production (approximately \$9 million); partially offset by higher average copper prices (approximately \$1 million). The higher cost of copper production included an unfavorable change in heap leach and work-in-process inventory (approximately \$19 million); partially offset by lower costs associated with mine plan changes (approximately \$4 million) and lower closure expense from the adoption of SFAS No. 143 (approximately \$6 million).

South American Mines Operating Income

South American Mines reported operating income in the 2003 second quarter of \$27.4 million, compared with operating income of \$20.2 million in the 2002 second quarter.

South American Mines reported operating income of \$63.6 million for the first six months of 2003, compared with operating income of \$47.7 million for the first six months of 2002.

(Refer to the separate discussion of PDMC's segments below for further detail.)

Candelaria Segment Operating Income

Edgar Filing: PHELPS DODGE CORP - Form 10-Q

The Candelaria open-pit mine is located near Copiapó in northern Chile and produces copper concentrates. We own an 80 percent partnership interest in Candelaria, a Chilean contractual mining company, and we apply the proportional consolidation method of accounting. Operating income of \$13.6 million in the 2003 second quarter increased \$0.4 million compared with the 2002 second quarter, primarily due to higher average

realized prices (\$2 million) and lower unit cost of copper production (approximately \$2 million); partially offset by lower copper sales volumes (approximately \$3 million).

Operating income of \$36.7 million for the first six months of 2003 increased \$3.3 million compared with the corresponding 2002 period, primarily due to lower cost of copper production (\$4 million) resulting from a higher copper ore grade (approximately \$1 million) and lower downstream rates (approximately \$3 million).

Cerro Verde Segment Operating Income

The Cerro Verde open-pit mine, located near Arequipa, Peru, produces electrowon copper cathode. We own approximately 82 percent of the common stock of Cerro Verde, which we fully consolidate and show the minority interest. The 2003 second quarter operating income of \$8.6 million increased \$1.8 million from the 2002 second quarter, primarily due to higher average copper prices (approximately \$1 million) and lower cost of copper production (approximately \$1 million) primarily due to higher production.

Operating income of \$16.1 million for the first six months of 2003 increased \$2.5 million from the corresponding 2002 period, primarily due to higher average copper prices (approximately \$3 million) and higher copper sales volumes (approximately \$1 million); partially offset by higher cost of copper production (approximately \$1 million) primarily due to the change in heap leach and work-in-process inventory.

El Abra Segment Operating Income

The El Abra open-pit mine is located in northern Chile and produces electrowon copper cathode. We own a 51 percent partnership interest in El Abra, a Chilean contractual mining company, and we apply the proportional consolidation method of accounting. The remaining 49 percent interest is owned by Corporación Nacional del Cobre de Chile (CODELCO), a Chilean state-owned company. The 2003 second quarter operating income of \$5.2 million increased \$5.0 million from the 2002 second quarter, primarily due to higher average copper prices (approximately \$3 million) and lower cost of copper production (approximately \$2 million) primarily comprising lower electricity costs (approximately \$1 million).

Operating income of \$10.8 million for the first six months of 2003 increased \$10.1 million from the corresponding 2002 period, primarily due to higher average copper prices (approximately \$6 million) and lower cost of copper production (approximately \$4 million) primarily comprising a favorable change in heap leach and work-in-process inventory (approximately \$8 million) and lower energy costs (approximately \$2 million); partially offset by higher depreciation expense (approximately \$2 million) and lower production levels (approximately \$2 million).

Primary Molybdenum Operating Income (Loss)

Primary Molybdenum includes our wholly owned Henderson and Climax molybdenum mines in Colorado and conversion facilities in the United States and Europe. Henderson produces high-purity, chemical-grade molybdenum concentrates, which are further processed into value-added molybdenum chemical products. Climax is currently on care-and-maintenance status. We expect to bring Climax into production concurrent with the exhaustion of the Henderson molybdenum mine reserves for continued long-term primary molybdenum supply for the chemicals business.

Primary Molybdenum operations reported operating income in the 2003 second quarter of \$0.4 million, compared with operating income of \$0.5 million in the second quarter of 2002. The 2003 second quarter decrease of \$0.1 million primarily was due to higher average molybdenum prices (approximately \$24 million), essentially offset by higher mining costs (approximately \$3 million), higher costs of third-party purchases and by-product molybdenum (approximately \$18 million), higher shutdown expenses (approximately \$2 million) and higher marketing costs (approximately \$1 million).

Primary Molybdenum operations reported operating income of \$0.5 million for the first six months of 2003, compared with operating income of \$0.2 million for the first six months of 2002. The increase of \$0.3 million primarily was due to higher average molybdenum prices (approximately \$39 million); offset by higher production costs (approximately \$10 million), higher costs of third-party purchases and by-product molybdenum (approximately \$26 million), higher shutdown expenses (approximately \$2 million) and lower tolling profits (approximately \$1 million). The higher production costs primarily resulted from higher mining (approximately \$5 million), conversion cost (approximately \$3 million), and energy costs (approximately \$1 million).

PDMC Other Matters

We have approximately 700 million to 760 million pounds of curtailed annual copper production capacity (100 percent basis), depending on near-term mine plans, that could be brought to market. At the end of the 2003 second quarter, such capacity approximated 705 million pounds (660 million pounds, in the United States and 45 million pounds internationally). This curtailed capacity is located at eight of our mine sites, all with existing infrastructures. Approximately 605 million to 665 million pounds of this curtailed annual capacity is located at our active mine sites and approximately 95 million pounds is located at inactive sites (50 million at Cobre and 45 million at Ojos del Salado).

Any decision to recommence full operations at these sites will depend on several factors including then-prevailing copper prices, management's assessment of copper market fundamentals and its estimates of future copper price trends and the extent to which any such new production is necessary for the efficient integration of the Company's other copper-producing operations at that time. Management's assessment of copper market fundamentals will reflect its judgment about future global economic activity and demand, and its estimates of the likelihood and timing of curtailed or new projects of competitors being placed into production. While there is no single copper price threshold that would necessarily trigger the recommencement of full operations at any of these sites, management does not expect to recommence operations until there has been a significant improvement in copper market fundamentals or a production integration inefficiency that could be alleviated by such recommencement.

Any material change in the price we receive for copper, or in PDMC's implied unit cost of copper production, has a significant effect on our results. Based on expected 2003 annual production of approximately 2.1 billion pounds of copper, each 1 cent per pound change in the average annual copper price, or in average annual implied unit cost of copper production, causes a variation in annual operating income before taxes of approximately \$21 million.

Our current annual molybdenum production is approximately 51 million pounds (approximately 23 million pounds from primary mines and 28 million pounds from by-product mines). Approximately 70 percent of our molybdenum contracts are priced based on the average of the previous 30 days of published prices (i.e., *Platts Metals Week*, *Ryan's Notes*, or *Metal Bulletin*), plus premiums. Accordingly, each \$1.00 per pound change in our average annual realized molybdenum price causes a variation in annual operating income before taxes of approximately \$36 million (subject to any negotiated limitations in outstanding customer agreements).

From time to time, we may purchase or sell copper price protection contracts for a portion of our expected future mine production. We do this to limit the effects of potential decreases in copper selling prices. We did not have any outstanding copper price protection contracts on June 30, 2003.

PDMC New Mexico Reclamation

Mining and smelting operations with leaching, tailing ponds, surface impoundments and other discharging facilities in New Mexico are subject to regulation under the New Mexico Water Quality Act and the Water Quality Control Commission (WQCC) Regulations. The Chino, Cobre and Tyrone mines and the Hidalgo smelter each have obtained multiple discharge permits for their operations, which specify operational, monitoring and notification requirements. These permits are issued for five-year terms and require renewal following the end of each permit term. The WQCC Regulations authorize the New Mexico Environment Department (NMED), which administers the discharge permit program, to require the submission of closure plans showing how applicable discharge permit requirements will be met following closure. Under certain circumstances, NMED also may require submission and approval of abatement plans to address the exceedance of applicable water quality standards.

Further, Chino, Cobre, Tyrone and Hidalgo must submit closure plans for their operations. Hidalgo has an approved closure plan under its discharge permit. The three mines have submitted closure plans, which have been combined with closeout plans under the New Mexico Mining Act (NMMA), as discussed below. The proposed closure plans currently are subject to approval by NMED as part of separate discharge permits for closure for each of the three operations that would supplement the existing discharge permits (hereinafter referred to as closure permits). The proposed closure permits contain a number of permit conditions that would modify the proposed closure plans. Chino Mines Company and NMED reached agreement in December 2001 on proposed closure permit conditions presented at a public hearing in February 2002. On January 23, 2003, NMED's hearing officer issued a

decision approving the closure permit as proposed by NMED and Chino, with minor changes. NMED issued a permit consistent with the hearing officer's decision on February 24, 2003. An appeal has been filed by a local environmental group. Phelps Dodge Tyrone, Inc. and NMED were unable to reach agreement on permit terms before a public hearing held in May 2002, and presented competing permit proposals. Other parties who participated in the public hearing presented their own proposals. On March 7, 2003, Tyrone received the hearing officer's decision on its permit, which generally adopted NMED's proposal. On April 2, 2003, Tyrone filed an appeal of the hearing officer's decision with WQCC. NMED issued a permit in accordance with the hearing officer's decision on April 8, 2003, which Tyrone also has appealed. Cobre Mining Company and NMED also have not reached agreement on the terms of a closure permit. The closure permit for Cobre Mining Company does not require a public hearing, and may be issued by NMED at any time.

Chino, Cobre and Tyrone also are subject to permit requirements under NMMA, which was passed in 1993. Following adoption of the New Mexico Mining Act Rules (NMMAR) in 1994, Chino, Cobre and Tyrone received initial permits as existing mining operations under NMMAR in 1997. These permits require revisions to incorporate approved closeout plans, which consist of plans for reclamation of the mining operations to achieve a self-sustaining ecosystem or an approved post-mining land use following cessation of operations at a mine. Existing mining operations may seek a waiver of these reclamation standards for open pits and waste units based upon a demonstration that achieving these standards is technically or economically infeasible or environmentally unsound, as long as measures will be taken to meet air and water quality standards following closure.

NMMAR originally required approval of a closeout plan for an existing mining operation by December 31, 1999, based upon an extension granted by the Director of the Mining and Minerals Division (MMD). NMMAR subsequently was amended to extend the deadline for closeout plan approval until December 31, 2001, and later to October 1, 2002. NMMAR contains a requirement that NMED must provide MMD with a determination that a closeout plan meets applicable environmental standards, including air and water quality standards, before MMD can approve the closeout plan. NMED's policy is to issue this determination after it has issued closure permits for the facility that submits the closeout plan. In early 2001, Chino, Cobre and Tyrone submitted comprehensive closure/closeout plans (CCPs) to both NMED and MMD intended to address the requirements of both the WQCC Regulations and NMMAR. Approval of the CCPs under NMMAR would require the granting of waivers by MMD as authorized under NMMAR. The CCPs were the subject of the public hearings before NMED for Chino and Tyrone, as discussed above.

As of October 1, 2002, NMED had not issued closure permits for Chino, Cobre or Tyrone. Consequently, as of October 1, 2002, MMD had not approved closeout permits for these three mines. MMD issued Notices of Violation (NOVs) to Chino, Cobre and Tyrone because the three mines did not obtain approved closeout plans by the October 1, 2002, deadline. The NOVs were modified by the Mining Commission following a public hearing to set new deadlines for closeout plan approval tied to NMED permit actions. Based on NMED's permit actions, closeout plan approval for Chino is now due by September 24, 2003, and the closeout plan approval date for Tyrone is April 8, 2004. The closeout plan approval deadline for Cobre will be nine months from the date of NMED's permit issuance, which is currently pending.

NMMAR contains specific requirements regarding financial assurance that must be provided to MMD to assure that sufficient funds would be available to MMD to carry out the closeout plan in the event of a default by the permittee. NMED also may require financial assurance under the WQCC Regulations. The financial assurance requirements are based upon the net present value of estimated costs to carry out the requirements of the closure permit and the approved closeout plan, assuming the state would hire a third-party contractor to conduct the work. Actual reclamation costs may differ significantly from the costs estimated under the permits due to advances in technology and reclamation techniques and opportunities to prepare each site for more efficient reclamation through careful development of the site over time. Consequently, the estimated costs under the permits are higher than the cost the Company would be expected to incur if the Company performed the work.

The CCPs submitted in early 2001 contained cost estimates of approximately \$100 million for Chino, \$121 million for Tyrone, and \$9 million for Cobre, based upon unescalated and undiscounted capital and operating costs over a 30-year operating period. The closure permit negotiated by NMED and Chino Mines Company and approved by the NMED hearing officer has an estimated cost of approximately \$394 million, based

upon third-party unescalated and undiscounted capital and operating costs over a 100-year operating period, including the cost of technical studies required under the permit. The Company's two-thirds share of NMED's \$394 million estimate is approximately \$263 million and our joint venture partner's cost share is approximately \$131 million. We estimate total costs for Chino Mines Company to achieve the closure standards required by NMED to be approximately \$264 million (100 percent basis); that estimate is approximately one-third lower than the financial assurance cost estimate as a result of the Company's historical cost advantages, savings from the use of the Company's own personnel and equipment versus third-party contract costs, and opportunities to prepare the site for more efficient reclamation. The financial assurance cost estimate includes approximately \$10 million (100 percent basis) of costs the Company has recognized in environmental reserves. The Company's two-thirds share of these costs is approximately \$176 million and our joint venture partner's cost share is approximately \$88 million. At June 30, 2003, and December 31, 2002, we had accrued approximately \$18 million and \$8 million, respectively, (two-thirds basis) for reclamation at Chino. The NMED cost estimate for Chino is subject to further review, and possible adjustment, by MMD under NMMAR.

NMED estimated the cost to carry out the requirements of its proposed closure permits for Tyrone at approximately \$440 million, without discounting or escalation, under NMED's proposal at the May 2002 hearing; Tyrone estimated the cost of its proposal at approximately \$328 million, without discounting or escalation over a 100-year operating period. NMED has not yet supplied its proposed cost estimate for Cobre. The proposed terms of the closure permits would require additional studies over the five-year term of the permits to refine the closure plan. The plan requirements and cost estimates may increase or decrease based upon the results of the studies and other factors, including changes in technology, completion of some closure and reclamation work, and inflation.

Based upon NMED's undiscounted financial assurance cost estimates for the Tyrone plan of approximately \$440 million, and considering the same cost advantages as indicated in the above discussion regarding Chino, we estimate the Company's costs to achieve the closure standards under that estimate to be approximately \$288 million for Tyrone. The Company has not obtained approval from NMED of an estimate of its cost to achieve the closure standards that would be required by the hearing officer's decision. The Company's current cost estimate for Cobre of approximately \$9 million will be updated with the issuance of the discharge permit. At June 30, 2003, and December 31, 2002, we had accrued closure costs of approximately \$60 million and \$27 million, respectively, at Tyrone and approximately \$6 million and \$2 million, respectively, at Cobre.

Following NMED's issuance of the closure permits, Chino, Cobre and Tyrone are required to submit proposals for financial assurance based upon the permit requirements and subject to NMED's approval. Under the proposed closure permit terms, the amount of financial assurance may be based upon the net present value (NPV) of the estimated cost for a third-party to implement the plan, using discount and escalation rates specified in the permit. These amounts are expected to be substantially lower than the undiscounted and unescalated cost estimates. For example, based upon the cost estimate approved by NMED, the financial assurance amount for Chino could be approximately \$191 million. This amount is based on annual escalation rates of approximately 3.2 percent for long-term water treatment costs and approximately 3.6 percent for other costs and discount rates of 5 percent for years one through 12 of the plan and 8 percent for years 13 through 100.

NMMAR requires that financial assurance for a closeout plan be approved and put in place before MMD can approve the closeout plan. Chino and Tyrone have provided approximately \$56 million and \$58 million of financial assurance in the form of surety bonds, respectively, to NMED under the terms of several discharge permits. The closure and financial assurance requirements of these permits have been superseded by the recently issued NMED closure permits. Consequently, the Company has advised NMED that this financial assurance should be terminated and replaced by new financial assurance under the terms of the new closure permits. Chino and Tyrone have submitted financial assurance proposals in accordance with the schedules under their NMED closure permit proposing financial assurance primarily in the form of corporate performance guarantees from the Company. Cobre also has approximately \$2 million of financial assurance in place held jointly by NMED and MMD. Following NMED's issuance of the closure permits, and prior to MMD's approval of the closeout plans, Chino, Tyrone and Cobre will be required to provide substantial amounts of additional financial assurance to cover the amounts of the approved cost estimates. Hidalgo currently has provided financial assurance in the amount of approximately \$11 million under its discharge permit.

- 49 -

In late May 2003, the Company and the state announced an agreement on a framework for the Company to provide financial assurance for Chino, Tyrone and Cobre under both NMMAR and WQCC Regulations. Under this agreement, the Company will provide financial assurance based upon the NPV of the cost estimates in a total amount of approximately \$484 million. Initially, approximately 70 percent of this amount will be covered by a corporate performance guarantee. At least \$50 million will be provided in the form of trust funds, increasing to at least \$75 million after five years. The balance will be provided as collateral, including liens on certain owned parcels of non-mining real estate located in New Mexico. In addition, the Company will expend at least \$30 million on accelerated closure and reclamation work over the next 10 years. The amount of the guarantee will be reduced to approximately 64 percent by the amount of accelerated reclamation performed. Finalization of the financial assurance is subject to completion of the permitting process, including additional public comment and hearings. MMD also has proposed some changes to NMMAR for consideration by the Mining Commission, which could affect the final financial assurance package.

RESULTS OF PHELPS DODGE INDUSTRIES

PDI, our manufacturing division, produces engineered products principally for the global energy, telecommunications, transportation and specialty chemicals sectors. Its operations are characterized by products with significant market share, internationally competitive cost and quality, and specialized engineering capabilities. The manufacturing division includes our Specialty Chemicals segment and our Wire and Cable segment. Our Specialty Chemicals segment includes Columbian Chemicals Company and its subsidiaries (Columbian Chemicals or Columbian). Our Wire and Cable segment consists of three worldwide product line businesses including magnet wire, energy and telecommunications cables, and specialty conductors.

PDI Sales

PDI reported sales to unaffiliated customers of \$320.6 million in the 2003 second quarter, compared with \$322.3 million in the 2002 second quarter. The decrease of \$1.7 million was due to lower sales volumes of wire and cable as a result of reduced demand stemming from continuing global economic uncertainty (approximately \$27 million). This decrease was mostly offset by higher specialty chemicals sales resulting primarily from higher average unit selling prices worldwide (approximately \$23 million) due to higher feedstock-related increases.

PDI reported sales to unaffiliated customers of \$643.6 million for the first six months of 2003, compared with \$629.1 million in the corresponding 2002 period. The increase of \$14.5 million was due to higher specialty chemicals sales resulting from higher sales volumes (approximately \$8 million) and higher average unit selling prices worldwide (approximately \$51 million) due to general market increases and higher feedstock-related increases. This increase was partially offset by lower sales volumes of wire and cable as a result of reduced demand stemming from continuing global economic uncertainty (approximately \$44 million).

PDI Operating Income

PDI reported operating income of \$18.5 million in the 2003 second quarter, compared with \$20.3 million in the 2002 second quarter.

PDI reported operating income of \$36.0 million for the first six months of 2003, including a special, net pre-tax gain of \$3.2 million, compared with operating income of \$36.3 million in the corresponding 2002 period.

(Refer to the separate discussion of PDI's Specialty Chemicals and Wire and Cable segments below for further detail.)

Note: Supplemental Data

The following table summarizes PDI's special items for the second quarter and first six months of 2003 and 2002 and the resultant earnings excluding these special items:

Termination of a foreign postretirement benefit plan	\$ 3.2	

Note: Our non-GAAP measure of special items may not be comparable to similarly titled measures reported by other companies.

- 51 -

Specialty Chemicals Operating Income

Specialty Chemicals reported operating income in the 2003 second quarter of \$15.0 million, compared with \$17.0 million in the 2002 second quarter. The 2003 second quarter decrease of \$2.0 million primarily was due to feedstock and natural gas cost increases, lower sales volumes and the timing of plant turnarounds (approximately \$32 million), partially offset by favorable sales revenues primarily from higher average unit selling prices worldwide (approximately \$28 million) due to higher feedstock-related increases and *Quest for Zero* improvements of approximately \$1 million.

Specialty Chemicals reported operating income of \$29.1 million for the first six months of 2003 including a special, net pre-tax gain of \$3.2 million, compared with operating income of \$30.2 million for the first six months of 2002. The decrease of \$1.1 million was minimized due to a special, pre-tax gain of \$3.2 million that resulted from the termination of a foreign postretirement benefit plan and *Quest for Zero* improvements of approximately \$4 million. In addition, feedstock and natural gas cost increases and the timing of plant turnarounds for specialty chemical operations (approximately \$61 million) were mostly offset by favorable sales revenues primarily from higher average unit selling prices worldwide (approximately \$51 million) due to higher feedstock-related increases.

Note: Supplemental Data

The following table summarizes Specialty Chemicals' special items for the first six months of 2003 and 2002 and the resultant earnings excluding these special items:

(Unaudited; \$ in millions)

	Six Months Ended June 30,	
	2003	2002
Special, pre-tax items	\$ 3.2	
Segment operating earnings excluding special items	\$25.9	30.2

Note: Our non-GAAP measure of special items may not be comparable to similarly titled measures reported by other companies.

Wire and Cable Operating Income

Wire and Cable reported operating income in the 2003 second quarter of \$3.5 million, compared with \$3.3 million in the 2002 second quarter. Wire and Cable's sales decreased \$27.3 million as a result of reduced demand stemming from continuing global economic uncertainty, and operating costs decreased \$27.5 million including *Quest for Zero* improvements of approximately \$1 million. There were no special items in either quarter.

Wire and Cable reported operating income of \$6.9 million for the first six months of 2003, compared with \$6.1 million for the first six months of 2002. Wire and Cable's sales decreased \$43.9 million as a result of reduced demand stemming from continuing global economic uncertainty, and operating costs decreased \$44.8 million including *Quest for Zero* improvements of approximately \$4 million. There were no special items in either six months ended June 30, 2003 and 2002.

OTHER MATTERS RELATING TO THE STATEMENT OF CONSOLIDATED OPERATIONS

Selling and General Administrative Expense

Our selling and general administrative expense increased \$6.0 million and \$6.5 million, respectively, for the three- and six-month periods ended June 30, 2003, compared with the corresponding 2002 periods. The increases primarily resulted from higher legal fees associated with the RAG settlement, SEC reviews and other legal matters.

Exploration and Research Expense

Edgar Filing: PHELPS DODGE CORP - Form 10-Q

Our net exploration and research expense was \$12.9 million in the 2003 second quarter, compared with \$9.2 million in the 2002 second quarter. The increase primarily resulted from slightly higher PDMC research expense (approximately \$2 million) and exploration expense (\$2 million).

Net exploration and research expense was \$22.5 million for the first six months of 2003, compared with \$17.9 million in the corresponding 2002 period. The increase primarily resulted from slightly higher PDMC research expense (approximately \$3 million) and exploration expense (approximately \$1 million).

Interest Expense

Interest expense decreased \$12.2 million in the 2003 second quarter, compared with the 2002 second quarter. The decrease in the 2003 second quarter primarily was attributable to reductions related to the payoff of long-term debt (approximately \$10.0 million) and project financing in 2002 (approximately \$2.8 million).

Interest expense decreased \$29.0 million for the first six months of 2003, compared with the corresponding 2002 period. The decrease was primarily attributable to reductions related to the payoff of long-term debt (approximately \$23.8 million) and project financing in 2002 (approximately \$5.9 million).

Miscellaneous Income (Expense), Net

Miscellaneous income (expense), net, increased \$12.6 million in the 2003 second quarter compared with the 2002 second quarter. The increase for the 2003 second quarter resulted primarily from the gain on sale of a cost-basis wire and cable investment (\$6.4 million), mark-to-market benefits on non-qualified pension plan assets (\$4.0 million), and foreign currency exchange gains (\$2.1 million); partially offset by higher shutdown expenses (\$1.9 million).

Miscellaneous income (expense), net, increased \$11.5 million for the first six months of 2003 compared with the corresponding 2002 period. The increase resulted primarily from the gain on sale of a cost-basis wire and cable investment (\$6.4 million), mark-to-market benefits on non-qualified pension plan assets (\$3.5 million), and foreign currency exchange gains (\$2.9 million); partially offset by higher shutdown expenses (\$3.8 million).

Benefit (Provisions) for Taxes on Income

The Company's income tax provision for the 2003 second quarter principally resulted from (i) taxes on earnings at international operations (\$12.2 million) that cannot be offset by losses at domestic operations and (ii) a benefit from finalizing year-end 2002 estimates in the Company's 2002 U.S. tax return filed in June 2003 (\$4.2 million). The Company's income tax provision for the six months ended June 30, 2003, primarily comprised the following: (i) taxes on earnings at international operations (\$26.3 million) that cannot be offset by losses at domestic operations and (ii) a benefit from finalizing year-end 2002 estimates in the Company's 2002 U.S. tax return filed in June 2003 (\$4.2 million).

The Company's income tax provision for the 2002 second quarter, primarily comprised the following: (i) a \$21.9 million benefit recognized for the second quarter 2002 net operating losses that, based on the March enactment of the Job Creation and Worker Assistance Act of 2002, may be carried back to recover prior years' taxes paid; (ii) a \$13.0 million benefit for release of deferred taxes previously provided with regard to Plateau Mining Corporation; and (iii) a \$4.1 million expense for taxes on earnings at international operations. The Company's income tax benefit for the six months ended June 30, 2002, principally comprised the following items: (i) a \$38.5 million tax benefit associated with the carryback of 2001 net operating losses that, based on the new tax legislation, may also be carried back to recover prior years' taxes paid; (ii) a \$34.8 million benefit recognized for the first half of 2002 net operating losses, based on the new tax legislation; (iii) a \$15.8 million expense for taxes on earnings at international operations; and (iv) a \$13.0 million benefit for release of deferred taxes previously provided.

The Company completed its 2002 federal income tax return in June 2003 and filed for a \$67.5 million tax refund, which was received in July 2003.

Cumulative Effect of Accounting Change

On January 1, 2003, we adopted SFAS No. 143, Accounting for Asset Retirement Obligations. With the adoption of this Statement, we recognize asset retirement obligations (AROs) as liabilities when incurred, with the initial measurement at fair value. These liabilities will be accreted to full value over time through charges to income. In addition, an asset retirement cost was capitalized as part of the related asset's carrying value and will subsequently be depreciated over the asset's useful life. Our AROs consist primarily of costs associated with mine reclamation and closure activities. These activities, which tend to be site specific, generally include costs for earthwork, revegetation, water treatment and demolition. Upon adoption, we recorded an increase to our closure and reclamation reserve of approximately \$2.5 million, net, an increase to our mining properties assets of approximately \$12.2 million and a cumulative gain of \$8.4 million, net of deferred taxes. For the three and six months ended June 30, 2003, the effect of adopting SFAS No. 143 decreased loss before cumulative effect of accounting change by approximately \$8 million, or 9 cents per common share, and \$11 million, or 12 cents per common share, respectively.

The following table summarizes the balance sheet impact associated with the adoption of SFAS No. 143:

(Unaudited; \$ in millions)

	December 31, 2002 As Reported*	SFAS No. 143 Adoption Impact	January 1, 2003 After Adoption
Mining properties	\$ 907.4	63.8**	971.2
Mining properties accumulated depreciation	(197.1)	(53.2)	(250.3)
Net mining properties assets	\$ 710.3	10.6	720.9
Intangibles	\$ 439.5	3.6**	443.1
Intangibles accumulated amortization	(93.6)	(2.0)	(95.6)
	\$ 345.9	1.6	347.5
Asset retirement obligation liability	\$ 138.6	10.4***	149.0

* Reflects the reclassification of mining concessions from property, plant and equipment, net to intangible assets (refer to Note 3, Reclassification of Intangible Assets, for further discussion).

** Amounts include \$84.0 million and \$7.5 million of additions related to recording an asset retirement cost, offset by \$20.2 million and \$3.9 million to reclassify amounts recognized as ore reserves in purchase accounting.

*** Amount consists of \$2.5 million of liabilities recognized at adoption and \$7.9 million of reclassifications related to closure obligations from other liabilities at adoption.

The *pro forma* effects of the application of SFAS No. 143 as if this Statement had been adopted on January 1, 2002, are presented below:

The *pro forma* asset retirement obligation liability balances as if SFAS No. 143 had been adopted on January 1, 2002, are as follows:

(Unaudited; \$ in millions)

<i>Pro forma</i> asset retirement obligation liability	January 1, 2002	\$ 138.1
<i>Pro forma</i> asset retirement obligation liability	December 31, 2002	\$ 149.0

Effective January 1, 2002, the Company adopted SFAS No. 142, Goodwill and Other Intangible Assets. Under SFAS No. 142, goodwill and intangible assets that have indefinite useful lives are not amortized, but rather tested at least annually for impairment. Intangible assets that have finite useful lives will continue to be amortized over their useful lives. Upon completion of the transitional impairment tests, the fair value of three of the Company's international wire and cable reporting units was determined to be less than the related carrying amount. The resulting impairment loss recognized upon adoption of SFAS No. 142 in the first quarter of 2002 was \$33.0 million, pre-tax (\$22.9 million after-tax), and was recognized as a cumulative effect of a change in accounting principle.

Subsequently, the Company completed its annual goodwill impairment test as of December 31, 2002, with no additional impairments. The Company will continue to test its goodwill annually as of December 31 unless events occur or circumstances change between annual tests that would more likely than not reduce the fair value of a reporting unit below its carrying amount.

The changes in the carrying amount of goodwill for the year ended December 31, 2002, and six months ended June 30, 2003, are as follows:

(Unaudited; \$ in millions)

	Specialty Chemicals Segment	Wire and Cable Segment	Total
Balance as of December 31, 2001	\$ 88.5	54.6	143.1
Impairment losses upon adoption of SFAS No. 142		(33.0)	(33.0)
Foreign currency translation adjustments	(19.4)		(19.4)
	69.1	21.6	90.7
Balance as of December 31, 2002	69.1	21.6	90.7
Foreign currency translation adjustments	8.9		8.9
	\$ 78.0	21.6	99.6
Balance as of June 30, 2003	\$ 78.0	21.6	99.6

CHANGES IN FINANCIAL CONDITION

Working Capital

During the first six months of 2003, net working capital balances (excluding cash and cash equivalents and debt) increased \$102.6 million. This increase resulted primarily from:

a \$101.0 million increase in accounts receivable primarily due to higher molybdenum sales volumes and realizations (approximately \$18 million), higher rod sales due to seasonal demand patterns (approximately \$22 million), the timing of copper receivable collections (approximately \$14 million), higher Specialty Chemicals sales volumes and prices (approximately \$26 million), higher Wire and Cable sales volumes (approximately \$2 million) and the timing of their receivable collections (approximately \$7 million), and higher net accounts receivable in the securitization program (approximately \$5 million); and

Edgar Filing: PHELPS DODGE CORP - Form 10-Q

a \$46.2 million decrease in accounts payable and accrued expenses primarily due to the payment for an historic Cyprus Amax lawsuit and arbitration award (\$48.6 million); partially offset by

- 55 -

a \$29.4 million decrease in mill and leach stockpiles and inventories due to higher copper sales (approximately \$22 million), higher molybdenum sales (approximately \$8 million), and lower current mill and leach stockpiles (approximately \$16 million); partially offset by an increase in Wire and Cable's inventory primarily due to inventories being low at year-end (approximately \$15 million); and

a \$12.6 million increase in accrued income taxes due to higher foreign taxes.

Debt

At June 30, 2003, our total debt was \$2,061.1 million, compared with \$2,110.6 million at year-end 2002. Our ratio of debt to total capitalization was 41.6 percent and 42.3 percent at June 30, 2003, and December 31, 2002, respectively.

In May 2003, the Company terminated \$375 million of fixed-to-floating interest rate swaps associated with corporate debt maturing in 2005 and 2007. In the second quarter 2003, we received cash proceeds of \$35.9 million; \$34.6 million was reflected as a deferred gain on the balance sheet and will be amortized over the remaining life of the underlying debt using the effective interest method.

As of June 30, 2003, the Company had no borrowings under its \$1 billion revolving credit facility that is available, provided compliance with covenant requirements, until its scheduled maturity on May 10, 2005.

In April 2002, the Financial Accounting Standards Board (FASB) issued SFAS No. 145, Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections. Under SFAS No. 4, all gains and losses from extinguishment of debt were required to be aggregated and, if material, classified as an extraordinary item, net of related income tax effect. This Statement eliminates SFAS No. 4 and, thus, the exception to applying Accounting Principles Board (APB) Opinion No. 30 to all gains and losses related to extinguishments of debt. As a result, gains and losses from extinguishment of debt should be classified as extraordinary items only if they meet the criteria in APB No. 30. Applying the provisions of APB No. 30 will distinguish transactions that are part of an entity's recurring operations from those that are unusual or infrequent or that meet the criteria for classification as an extraordinary item. As a result of this Statement being adopted by the Company on January 1, 2003, we will reclassify the third quarter 2002 extraordinary item for debt extinguishment to recurring operations in our Form 10-Q filing for the quarter ended September 30, 2003.

Capital Expenditures and Investments

Capital expenditures and investments for the first six months of 2003 were \$37.0 million for PDMC, \$16.4 million for PDI and \$23.9 million for other Corporate-related activities. Capital expenditures and investments for the first six months of 2002 were \$38.1 million for PDMC, \$9.5 million for PDI and \$3.2 million for other Corporate-related activities. We expect capital expenditures and investments for the year 2003 to approximate \$200 million, comprising approximately \$110 million for PDMC, approximately \$60 million for PDI, and approximately \$30 million for Corporate and other. These capital expenditures and investments are expected to be funded primarily from operating cash flow and cash reserves.

Dividends

For the first six months of 2003, Phelps Dodge has declared quarterly dividends of \$3.375 per mandatory convertible preferred share amounting to \$6.8 million.

Other Matters

Based on recent discussions with the Staff of the Securities and Exchange Commission regarding the balance sheet classification of certain mining concessions, primarily mining concessions containing proven and probable ore reserves and mineralized material at the Company's South American mines, the Company has reclassified such mining concessions from Property, plant and equipment, net to Intangible assets. Additionally, previously reported historical amounts have been reclassified for comparative purposes. Refer to Note 3 for further discussion.

On July 11, 2003, Phelps Dodge amended its Form S-3 to combine the outstanding \$150 million outstanding shelf registration into a new \$750 million shelf registration. On July 15, 2003, this shelf registration statement was declared effective by the SEC.

Contractual Obligations

The following tables summarize Phelps Dodge's contractual obligations at June 30, 2003, and the effect such obligations are expected to have on its liquidity and cash flow in future periods for short-term debt, long-term debt (including capital lease obligations) and take-or-pay contracts. The following table, as of June 30, 2003, reflects an update of only the major changes to the similar table presented in the Company's Form 10-K at December 31, 2002:

Debt and Take-or-Pay Contracts as of June 30, 2003:

(Unaudited; \$ in millions)

	<u>Less Than</u>		
	<u>Total</u>	<u>1 Year</u>	<u>1-3 Years</u>
Short-term debt	\$ 61.5	61.5	
Long-term debt	1,999.6	134.7	536.6
Take-or-pay contracts	604.4	167.1	205.6
		<u>4-5 Years</u>	<u>After 5 Years</u>
Short-term debt	\$		
Long-term debt	275.4		1,052.9
Take-or-pay contracts	129.2		102.5

Our take-or-pay contracts primarily include contracts for electricity (\$284.7 million), contracts for petroleum-based feedstock for conversion into carbon black (\$162.7 million), contracts for natural gas (\$35.8 million), and transportation and port fee commitments (\$45.6 million). Approximately 81 percent of our take-or-pay electricity obligations are through PD Energy Services, the legal entity used to manage power for PDMC at generally fixed-priced arrangements. PD Energy Services has the right and the ability to resell the electricity as circumstances warrant. Obligations for petroleum-based feedstock for conversion into carbon black are for specific quantities, and ultimately will be purchased based upon prevailing market prices at the time. These petroleum-based products may be re-sold to others if circumstances warrant. Obligations for natural gas provide for deliveries of specified volumes, at market-based prices, primarily to our carbon black operation in Brazil. Transportation obligations total \$32.8 million for exporting cathode produced at El Abra and Cerro Verde and copper in concentrate at Candelaria and for importing sulfuric acid to El Abra. Our carbon black facility in the United Kingdom has port fee commitments of \$12.8 million.

Guarantees

In November 2002, FASB issued Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others* (FIN 45). FIN 45 requires that upon issuance of certain guarantees, a guarantor must recognize a liability for the fair value of an obligation assumed under the guarantee. FIN 45 also requires significant new disclosures by guarantors, in both interim and annual financial statements, about obligations associated with guarantees issued. FIN 45 disclosure requirements were adopted for our year ended December 31, 2002; the initial recognition and measurement provisions were adopted on a prospective basis to guarantees issued or modified after December 31, 2002. There were no such guarantees issued in the first six months of 2003.

Other Items that May Affect Liquidity

New Mexico and Colorado's mined-land reclamation laws require financial assurance covering the future cost of reclamation. In contrast, Arizona's Mine Land Reclamation Act permits a company to satisfy financial assurance requirements by demonstrating it has financial strength to fund future reclamation costs identified in an approved reclamation plan. An investment-grade bond rating is one of the financial strength tests under the Arizona Act. Phelps Dodge's senior unsecured debt currently carries an investment-grade albeit at the lowest level in that category. Additionally, the Company currently meets another financial strength test in Arizona that is not ratings dependent.

Edgar Filing: PHELPS DODGE CORP - Form 10-Q

The cost of surety bonds (the traditional source of financial assurance) has increased significantly during the past year. Also, many surety companies are now requiring an increased level of collateral supporting the bonds. If surety bonds are unavailable, the Company could be required to post other collateral or possibly cash or cash equivalents directly in support of financial assurance obligations.

Diesel Fuel and Natural Gas Price Protection Programs

We purchase significant quantities of diesel fuel and natural gas to operate our facilities as an input to the manufacturing process and as input for electricity generation and copper refining.

To reduce the Company's exposure to price increases in these energy products, the Company enters into energy price protection programs. Our diesel fuel and natural gas price protection programs consist of purchasing a combination of out-of-the-money (OTM) call option contracts and fixed-price swaps. The OTM call option contracts give the holder the right, but not the obligation, to purchase a specific commodity (diesel fuel or natural gas) at a pre-determined price, or strike price. OTM call options are options that have a strike price above the current market price for that commodity. Call options allow the Company to cap the commodity purchase cost at the strike price of the option while allowing the Company to participate in commodity price reductions below the strike price. Swaps allow us to establish a fixed commodity purchase price for delivery during a specific future period.

As of June 30, 2003, our domestic mining diesel fuel price protection program, which started in 2000, had outstanding diesel fuel option contracts in place to hedge approximately 32 million gallons of diesel fuel, or 56 percent of our consumption forecast through September 2004. As of June 30, 2002, our domestic diesel fuel price protection program had 20.2 million gallons of diesel fuel hedged. Gains and losses on these hedge transactions were substantially offset by a similar amount of gain or loss on the underlying forecast diesel fuel purchases.

As of June 30, 2003, our domestic natural gas price protection program, which started in 2001, had outstanding natural gas option contracts in place to hedge approximately 2.2 million decatherms of natural gas, or 63 percent of our consumption forecast through October 2003. As of June 30, 2002, our domestic natural gas price protection program had outstanding natural gas option contracts in place to hedge approximately 2.5 million decatherms of natural gas. Gains and losses on these hedge transactions were substantially offset by a similar amount of gain or loss on the underlying forecast natural gas purchases.

Additionally, as of late July 2003, we had increased our outstanding natural gas option contracts to hedge approximately 11 million decatherms of natural gas, representing 72 percent of consumption forecast through December 2004.

Item 3. Quantitative and Qualitative Disclosure About Market Risk

There have been no material changes in the Company's market risk during the first six months of 2003. For additional information on market risk, refer to pages 51 and 93 through 97 of our report on Form 10-K for the year ended December 31, 2002.

Item 4. Controls and Procedures

The Company maintains a system of disclosure controls and procedures that is designed to ensure information required to be disclosed by the Company is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, in a timely manner. Management has reviewed this system of disclosure controls and procedures within 90 days of the date hereof, and has concluded that the current system of controls and procedures is effective.

The Company maintains a system of internal controls and procedures for financial reporting. Since the date of management's most recent evaluation, there were no significant changes in internal controls or in other factors that could significantly affect internal controls.

Part II. Other Information

Item 1. Legal Proceedings

I. Reference is made to paragraph XIX of Part II, Item 3, Legal Proceedings, of the Company's Form 10-K for the year ended December 31, 2002.

The Company and Columbian Chemicals Company, together with several other companies, have been named as defendants in an action entitled *Technical Industries, Inc. v. Cabot Corporation, et al.*, filed on January 30, 2003, in the U.S. District Court for the District of Massachusetts, and approximately 12 other actions filed in four U.S. district courts, on behalf of a purported class of all individuals or entities who purchased carbon black directly from the defendants from January 30, 1999, to January 30, 2003. The complaints in these actions, which allege that the defendants fixed the price of carbon black and engaged in other unlawful activities in violation of the U.S. antitrust laws, seek treble damages in an unspecified amount and attorneys' fees. A hearing was held on July 25, 2003, before the Judicial Panel on Multidistrict Litigation on motions to consolidate all these actions in one court; the Court has not yet ruled on the motion. The Company and Columbian Chemicals Company, together with several other companies, have also been named in an action entitled *Level Construction, Inc. v. Cabot Corporation, et al.*, filed in Superior Court of the state of California for the County of San Francisco

- 58 -

(and three other actions also filed in other California Superior Courts) on behalf of a purported class or indirect purchasers of carbon black in the state of California from as early as November 1998 to the present. The complaint alleges similar claims by indirect purchasers under California state law and seeks treble damages in an unspecified amount and attorneys' fees. The Company believes that all these claims are without merit and intends to defend the lawsuits vigorously.

Item 4. Submission of Matters to a Vote of Security Holders

Our annual meeting was held on May 23, 2003. A total of 78,264,691 common shares, or about 87.95 percent of our issued and outstanding common shares, were represented at the meeting. Set forth below is a description of the matters voted upon at the meeting and a summary of the voting regarding each matter:

	<u>For</u>	<u>Withheld</u>
Election of Directors:		
Robert N. Burt	76,514,243	1,750,447
Robert D. Krebs	74,441,117	3,823,573
William J. Post	74,112,333	4,152,357
Jack E. Thompson	76,711,151	1,553,539
Jon C. Madonna	74,596,021	3,668,669

	<u>For</u>	<u>Against</u>	<u>Abstain</u>
Approval of the 2003 Stock Option and Restricted Stock Plan	56,649,593	6,897,646	834,303

There were no broker non-votes included in the results of the election of directors or the approval of the 2003 Stock Option and Restricted Stock Plan.

The date of the 2004 annual meeting of shareholders was published in the 2003 Proxy Statement as May 5, 2004. The date has subsequently been changed from May 5, 2004, to May 28, 2004.

Item 6. Exhibits and Reports on Form 8-K

- (a) Any exhibits required to be filed by the Company are listed in the Index to Exhibits.
- (b) During the quarter ended June 30, 2003, the Company filed the following Current Reports on Form 8-K: (i) Current Report on Form 8-K bearing cover date of April 14, 2003, in which the Company reported under Item 9 and 12 that it had issued a press release announcing the rescheduling of the Company's annual meeting to May 23, 2003; (ii) Current Report on Form 8-K bearing cover date of April 15, 2003, in which the Company reported under Item 7 and 9 that it had furnished Certifications pursuant to 18 United States Code section 1350, as enacted by section 906 of the Sarbanes-Oxley Act of 2002; (iii) Current Report on Form 8-K bearing cover date of April 24, 2003, in which the Company reported under Item 7 and 9 that it had furnished Certification pursuant to 18 United States Code section 1350, as enacted by section 906 of the Sarbanes-Oxley Act of 2002; and (iv) Current Report on Form 8-K bearing cover date of April 29, 2003, in which the Company reported under Item 9 and 12 that it had issued a press release announcing financial results for the quarter ended March 31, 2003.

Signatures

Pursuant to the requirements of the Securities Exchange Act of 1934, the Corporation has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

Certifications

I, J. Steven Whisler, Chairman, President and Chief Executive Officer, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Phelps Dodge Corporation;

- 59 -

2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this quarterly report whether there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
